Capability Mitsuru Kodama, 2008-06-01 The progress of broadband ICT is having a big impact on individual lifestyles and corporate activities For corporate strategy broadband use goes beyond improving management efficiency to contributing to enhancing customer services and developing new markets In addition the shape of corporate organizations and their behavior is changing along with recent changes in the business environment and development of broadband networks It will become increasingly important for future business strategies to go beyond resources limited by business units within conventional corporate organizations to take positive initiatives with knowledge and competences outside the company as well as with the dynamic use of ICT through such means as external strategic alliances virtual corporations mergers and acquisitions and outsourcing This book describes that the full utilization of ICT based on fixed and mobile wireless broadband communication platforms supports managerial speed and excellence while making it possible to formulate new business models Chapter 1 describes business process innovations and new e business that activates the concepts and technology of video based information networks VIN based on the leading broadband and wireless technologies of multimedia communication networks Dynamic activities with VIN as a future network strategy support tool will enable business innovation through strengthening corporate competitiveness and enhancing customer services Chapter 2 considers theoretical frameworks related to ICT dynamic capability for companies that have employed ICT ICT dynamic capability comprises the three elements of context architecture boundaries consolidation and ICT application capabilities and is discussed from the viewpoint of the new knowledge creation process The interaction among actors dynamic use of VIN tools and the community knowledge creating cycle simultaneously enhances knowledge effectiveness and creativity Chapter 3 goes on to consider the decision making process that introduced and activated VIN tools within the company aimed at the acquisition of ICT dynamic capability from the perspective of a strategy making process Chapter 4 demonstrates community management frameworks exploiting VIN in the company through in depth case study The top down approach through the innovative leadership of community leaders who comprehensively manage the business community spread within and outside the company will enable the dynamic use of ICT by community members In Chapter 5 looking at the creation of business linking industry and academia the author considers cases of VIN development through a bottom up approach involving members in the strategic community and shows analysis from the viewpoint of ICT dynamic capability created from dynamic interaction of context and knowledge with customers who have crossed the organizational boundaries among industries In Chapter 6 through emergent strategies for small and medium sized companies the book justifies new knowledge in house after its creation from a trial and error process using a bottom up approach and the author looks at the feelings and behaviour of actors undertaking to improve in house productivity and customer services as a strategy for the entire company

In Chapter 7 the author takes up a case study of Sony and looks at an example of VIN tools adoption by means of Sony's deliberate strategy using a top down approach. Moreover, learning from Sony's trial error method, the author considers the process of a successful VIN adoption from a bottom up approach through emergent strategies centered on worksite organization. In Chapter 8 the author considers successful case studies of VIN adoption by large companies. The author considers the processes that productively resolve internally generated friction and conflict and transform corporate culture through the use of both top down and bottom up approaches. Finally, in Chapter 9 the book provides new insights derived from the case studies and theoretical and managerial implications related to new knowledge creation by ICT dynamic capability. Bridging theory and practice and providing international scope, this book will be invaluable to academics and students with an interest in business management, ICT, and to managers in high tech industries.

Value Stream Design Klaus Erlach, 2012-09-05

Value stream design is increasingly asserting itself as the key approach for production optimization, but there has never been a detailed and systematic presentation of the value stream method before. A gap that has now been filled by this book. The author provides an easily comprehensible code of practice for the effective analysis of production processes, product family oriented factory structuring, and the target oriented development of an ideal future state of production. The book plausibly conveys ten design guidelines for production optimization with corresponding equations, descriptive illustrations, and industrial examples well proven in numerous industrial projects. It addresses the professional public practitioners wishing to avoid waste and systematically improve their factories' value streams, and students tomorrow's practitioners. In contrast to other publications, this book complements the value stream analysis and its unique compact visualization of the entire production process by a detailed illustration of the information flow and a comprehensive discussion of the operator balance chart. The traditional concept of value stream design is significantly expanded with a view to its applicability in complex productions by way of methodological innovation and further development concerning campaign formation, value stream management, and technological process integration. The method is embedded in a comprehensive procedural approach for factory planning, starting with the definition of the desired lean production goals.
