BOAT TRIM SYSTEM

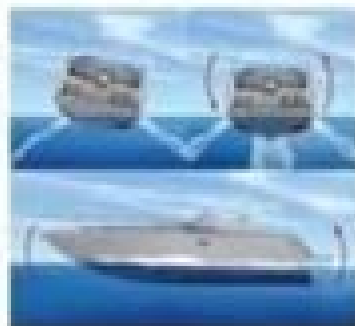

Single controller only, automatically

The Boat Trim System (BTS) with its patented ultrasonic technology gives you perfect control over pitch and trim with rapid response, variable rate of rise, faster trim retraction, zero trim position lock (Zero Lock), and the Automatic Boat Trim system which takes over the task of keeping the boat correctly trimmed - automatically!

Superior control

Thanks to the ultrasonic technology you get maximum ride - the air pressure automatically rises or falls in direct proportion to wave height, automatically adjusting the trim to match the conditions. It provides optimum ride in rough weather - wind, waves and swell - and also allows the operator to adjust trim manually. The ultrasonic system allows the boat to follow the wave face and ride the wave.
