Women Writers Of The American West 1833 1927:

Women Writers of the American West, 1833-1927 Nina Baym, 2011-03-01 Women Writers of the American West 1833 1927 recovers the names and works of hundreds of women who wrote about the American West during the nineteenth and early twentieth centuries some of them long forgotten and others better known novelists poets memoirists and historians such as Willa Cather and Mary Austin Holley Nina Baym mined literary and cultural histories anthologies scholarly essays catalogs advertisements and online resources to debunk critical assumptions that women did not publish about the West as much as they did about other regions Elucidating a substantial body of nearly 650 books of all kinds by more than 300 writers Baym reveals how the authors showed women making lives for themselves in the West how they represented the diverse region and how they represented themselves Baym accounts for a wide range of genres and geographies affirming that the literature of the West was always more than cowboy tales and dime novels Nor did the West consist of a single landscape as women living in the expanses of Texas saw a different world from that seen by women in gold rush California Although many women writers of the American West accepted domestic agendas crucial to the development of families farms and businesses they also found ways to be forceful agents of change whether by taking on political positions deriding male arrogance or as their voluminous published works show speaking out when they were expected to be silent Women

Writers of the American West, 1833-1927 Nina Baym, 2012-08-17 This book recovers the names and works of women who wrote about the American West during the nineteenth and early twentieth centuries some of them long forgotten and others better known such as Willa Cather and Mary Austin Holley It reveals how the authors showed women making lives for themselves in the West how they represented the diverse region and how they represented themselves **Teaching**

the forty year period between Mexico's independence from Spain 1821 and the beginning of the US Civil War Astrid Haas explores accounts by Anglo American Mexican and German authors members of the region's three major settler populations who recorded their journeys through Texas They were missionaries scientists journalists emigrants emigration agents and military officers and their spouses They all contributed to the public image of Texas and to debates about the future of the region during a time of political and social transformation Drawing on sources and scholarship in English Spanish and German Lone Star Vistas is the first comparative study of transnational travel writing on Texas Haas illuminates continuities and differences across the global encounter with Texas while also highlighting how individual writers particular backgrounds affected their views on nature white settlement military engagement Indigenous resistance African American slavery and Christian mission

Lynching in American Literature and Journalism Yoshinobu Hakutani, 2024-04-08 Lynching in American Literature and Journalism consists of twelve essays investigating the history and development of writing about lynching as an American tragedy and the ugliest element of national character According to the Tuskegee Institute 4 743 people were lynched between 1882 and 1968 in the United States including 3 446 African Americans and 1 297 European Americans More than 73 percent of the lynchings in the Civil War period occurred in the Southern states The Lynchings increased dramatically in the aftermath of the Reconstruction after slavery had been abolished and free men gained the right to vote The peak of lynching occurred in 1882 after Southern white Democrats had regained control of the state legislatures This book is a collection of historical and critical discussions of lynching in America that reflects the shameful unmoral policies and explores the topic of lynching within American history literature and journalism

Fictions of Western American Domesticity Amanda J. Zink, 2018-06-01 This work provides a compelling explanation of something that has bedeviled a number of feminist scholars Why did popular authors like Edna Ferber continue to write conventional fiction while living lives that were far from conventional Amanda J Zink argues that white writers like Ferber and Willa Cather avoided the subject of their own domestic labor by writing about the performance of domestic labor by others showing that American print culture both in novels and through advertisements moved away from portraying women as angels in the house and instead sought to persuade other women to be angels in their houses Zink further explores lesser known works such as Mexican American cookbooks and essays in Indian boarding school magazines to show how women writers dialoging domesticity exemplify the cross cultural encounters between colonial domesticity and sovereign domesticity By situating these interpretations of literature within their historical contexts Zink shows how these writers championed and challenged the ideology of domesticity

American Women's Regionalist Fiction Monika Elbert, Rita Bode, 2021-01-04 American Women's Regionalist Fiction Mapping the Gothic seeks to redress the monolithic vision of American Gothic by analyzing the various sectional or regional attempts to Gothicize what is most claustrophobic or peculiar about local history Since women writers were often relegated to inferior status it is especially compelling to look at women from the Gothic perspective The

regionalist Gothic develops along the line of difference and not unity thus emphasizing regional peculiarities or a sense of superiority in terms of regional history natural landscapes immigrant customs folk tales or idiosyncratic ways The essays study the uncanny or the haunting quality of the commonplace as Hawthorne would have it in his introduction to *The House of the Seven Gables* in regionalist Gothic fiction by a wide range of women writers between ca 1850 and 1930 This collection seeks to examine how if the regionalist perspective is small limited and stultifying and leads to Gothic moments or whether the intersection between local and national leads to a clash that is jarring and Gothic in nature

Women in the Old West (A True Book) Marti Dumas, 2021-01-26 Many women of different backgrounds lived together in the American West Former enslaved women left the racism of the Southern states to find a new life White settlers traveled alone or with their families seeking their fortune as farmers teachers or gold miners They met Mexican and Native American women who already lived in the territory They were later joined by Japanese and Chinese immigrant women All these women faced hardship and an unfamiliar life as they fought for their rights their freedom and their land in the American West This book tells their story Women are sometimes called the silent protagonists of history But since before the founding of our nation until now women have organized marched and inspired They forced change and created opportunity With engaging text fun facts photography infographics and art this new set of books examines how individual women of differing races and socioeconomic status took a stand and how groups of women lived and fought throughout the history of this country It looks at how they celebrated victories that included the right to vote the right to serve their country and the right to equal employment The aim of this much needed set of five books is to bring herstory to young readers

Before the West Was West Amy T. Hamilton, Tom J. Hillard, 2014-11-01 Before the West Was West examines the extent to which scholars have engaged in depth with pre 1800 western texts and asks what we mean by western American literature in the first place and when that designation originated Calling into question the implicit temporal boundaries of the American West in literature a literature often viewed as having commenced only at the beginning of the 1800s Before the West Was West explores the concrete meaningful connections between different texts as well as the development of national ideologies and mythologies Examining pre nineteenth century writings that do not fit conceptions of the Wild West or of cowboys cattle ranching and the Pony Express these thirteen essays demonstrate that no single unified idea or geography defines the American West Contributors investigate texts ranging from the Norse Vinland Sagas and Mary Rowlandson's famous captivity narrative to early Spanish and French exploration narratives an eighteenth century English novel and a play by Aphra Behn Through its examination of the disparate and multifaceted body of literature that arises from a broad array of cultural backgrounds and influences Before the West Was West apprehends the literary West in temporal as well as spatial and cultural terms and poses new questions about westernness and its literary representation
