Tyranny of the Gene James Tabery, 2023-08-15 A revelatory account of how power politics and greed have placed the unfulfilled promise of personalized medicine at the center of American medicine The United States is embarking on a medical revolution Supporters of personalized or precision medicine the tailoring of health care to our genomes have promised to usher in a new era of miracle cures Advocates of this gene guided health care practice foresee a future where skyrocketing costs can be curbed by customization and unjust disparities are vanquished by biomedical breakthroughs Progress however has come slowly and with a price too high for the average citizen In *Tyranny of the Gene* James Tabery exposes the origin story of personalized medicine essentially a marketing idea dreamed up by pharmaceutical executives and traces its path from the Human Genome Project to the present revealing how politicians influential federal scientists biotech companies and drug giants all rallied behind the genetic hype The result is a medical revolution that privileges the few at the expense of health care that benefits us all Now American health care driven by the commercialization of biomedical research is shifting focus away from the study of the social and environmental determinants of health such as access to fresh and nutritious food exposure to toxic chemicals and stress caused by financial insecurity Instead it is increasingly investing in miracle pills for leukemia that would bankrupt most users genetic studies of minoritized populations that ignore structural racism and walk dangerously close to eugenic conclusions and oncology centers that advertise the perfect gene drug match igniting a patient's hope and often dashing it later *Tyranny of the Gene* sounds a warning cry about the current trajectory of health care and charts a path to a more equitable alternative
