Tom Swift and His Electric Rifle; Or Daring Adventures in Elephant Land Victor Eugène Gjuze, Victor Appleton - *Tom Swift and His Electric Rifle* Victor Appleton, 2016-10-07

While Tom Swift is working on his latest new invention, the electric rifle, he meets an African safari master whose stories of elephant hunting send the group off to the deepest, darkest Africa. Hunting for ivory is the least of their worries as they find out some old friends are being held hostage by the fearsome tribes of the red pygmies. Swift builds two major inventions in this volume. The first is a replacement airship known as The Black Hawk. This new airship is to replace The Red Cloud, which was destroyed during his adventures in *Tom Swift in the Caves of Ice*. This airship is of the same general construction as The Red Cloud but is smaller and more maneuverable. Of foremost notice is Swift's invention of the electric rifle, a gun which fires bolts of electricity. The electric rifle can be calibrated to different levels of range, intensity, and lethality; it can shoot through solid walls without leaving a hole and is powerful enough to kill a rampaging whale, as in their steamer trek to Africa. With the electric rifle, Tom and friends bring down elephants, rhinoceroses, and buffalo and save their lives several times in pitched battle with the red pygmies. It also can discharge a globe of light that was described as being able to maintain itself like ball lightning, making hunting at night much safer in the dark of Africa. In appearance, the rifle looked very much like contemporary conventional rifles.

CHAPTER I TOM HOPES FOR A PRIZE

Father exclaimed Tom Swift looking up from a paper he was reading. I think I can win that prize. What prize is that? inquired the aged inventor gazing away from a drawing of a complicated machine and pausing in his task of making some intricate calculations. You don't mean to say Tom that you're going to have a try for a government prize for a submarine after all? No not a submarine prize dad and the youth laughed. Though our Advance would take the prize away from almost any other under water boat I imagine. No it's another prize I'm thinking about. What do you mean? Well I see by this paper that the Touring Club of America has offered three thousand dollars for the speediest electric car. The tests are to come off this fall on a new and specially built track on Long Island and it's to be an endurance contest for twenty four hours or a race for distance they haven't yet decided. But I'm going to have a try for it dad and besides winning the prize I think I'll take Andy Foger down a peg. What's Andy been doing now? Oh nothing more than usual. He's always mean and looking for a chance to make trouble for me but I didn't refer to anything special. He has a new auto you know and he boasts that it's the fastest one in this country. I'll show him that it isn't for I'm going to win this prize with the speediest car on the road. But Tom you haven't any automobile you know and Mr Swift looked anxiously at his son who was smiling confidently. You can't be going to make your motor cycle into an auto are you? No dad. Then how are you going to take part in the prize contest? Besides electric cars as far as I know aren't specially speedy. I know it and one reason why this club has arranged the contest is to improve the quality of electric automobiles. I'm going to build an electric runabout dad. An electric runabout. But it will have to be operated with a storage battery Tom and you haven't. I guess you're going to say I haven't any storage battery. dad interrupted Mr Swift's son. Well I haven't yet but I'm going to have one. I've been working on. Oh ho exclaimed the aged inventor with a laugh. So that's what you've been tinkering over these last few weeks eh Tom? I suspected it was some new invention but I didn't suppose it was that. Well how are you coming on with it? Pretty good I think I've got a new idea for a battery and I made an experimental one. I gave it some pretty severe tests and it worked fine. But you haven't tried it out in a car yet over rough roads and under severe conditions have you? No I haven't had a chance. In fact when I invented the battery I had no idea of using it on a car. I thought it might answer for commercial purposes or for storing a current generated by windmills. But when I read that account in the papers of the Touring Club offering a prize for the best electric car it occurred to me that I might put my battery into an auto and win. Hum remarked Mr
