Garrison,Jerry D. Ward,2000 Tomorrow s Transportation Changing Cities Economies and Lives offers a broad engaging look at current and emergent developments in Intelligent Transport Systems ITS and at how improved transportation systems can have a significant impact on lifestyles in the future It is an excellent guide for transportation department officials and planners as well as ITS technology professionals working in mobile communications computer and software engineering smart sensor technology and in transportation infrastructures worldwide **Intelligent Vehicle Technology and Trends** Richard Bishop,2005 This groundbreaking resource offers you a comprehensive overview of cutting edge intelligent vehicle IV systems aimed at providing enhanced safety greater productivity and less stress for drivers Rather than bogging you down with difficult technical discourse this easy to understand book presents a conceptual and realistic view of how IV systems work and the issues involved with their introduction into road vehicles Helping you apply your skills to this emerging field this practical reference offers you a thorough understanding of how electronics and electronic systems must work within automobiles heavy trucks and buses *Choice* ,2005 American Book Publishing Record ,2000 **The British National Bibliography** Arthur James Wells,2000 **Books in Print Supplement** ,2002 *National Union Catalog* ,1978 Includes entries for maps and atlases *Forthcoming Books* Rose Arny,1997 **Subject Guide to Books in Print** ,1991
Whitaker's Books in Print ,1998 *Tomorrow's Transportation* United States. Urban Transportation Administration,1968 **Disrupting Mobility** Gereon Meyer,Susan Shaheen,2017-01-05 This book explores the opportunities and challenges of the sharing economy and innovative transportation technologies with regard to urban mobility Written by government experts social scientists technologists and city planners from North America Europe and Australia the papers in this book address the impacts of demographic societal and economic trends and the fundamental changes arising from the increasing automation and connectivity of vehicles smart communication technologies multimodal transit services and urban design The book is based on the Disrupting Mobility Summit held in Cambridge MA USA in November 2015 organized by the City Science Initiative at MIT Media Lab the Transportation Sustainability Research Center at the University of California at Berkeley the LSE Cities at the London School of Economics and Politics and the Innovation Center for Mobility and Societal Change in Berlin **Disruptive Transport** William Riggs,2018-12-07 With the rise of

shared and networked vehicles autonomous vehicles and other transportation technologies technological change is outpacing urban planning and policy Whether urban planners and policy makers like it or not these transformations will in turn result in profound changes to streets land use and cities But smarter transportation may not necessarily translate into greater sustainability or equity There are clear opportunities to shape advances in transportation and to harness them to reshape cities and improve the socio economic health of cities and residents There are opportunities to reduce collisions and improve access to healthcare for those who need it most particularly high cost high need individuals at the younger and older ends of the age spectrum There is also potential to connect individuals to jobs and change the way cities organize space and optimize trips To date very little discussion has centered around the job and social implications of this technology Further policy dialogue on future transport has lagged particularly in the arenas of sustainability and social justice Little work has been done on decision making in this high uncertainty environment a deficiency that is concerning given that land use and transportation actions have long and lagging timelines This is one of the first books to explore the impact that emerging transport technology is having on cities and their residents and how policy is needed to shape the cities that we want to have in the future The book contains a selection of contributions based on the most advanced empirical research and case studies for how future transport can be harnessed to improve urban sustainability and justice
