Wings David H. Brandin,2015-05-15 David Brandin loves tales that end with an unusual twist In his collection of thirty eight flash fiction stories he cleverly intertwines satire with political incorrectness to deliver one of a kind political historical science fiction and fantasy tales that each come to a surprising conclusion Divided into four sections Brandins stories begin by exploring political scheming as a president struggles with a church sermon on the seven deadly sins a poorly qualified candidate defends his nomination to an ambassadorship and asylum is claimed under unusual circumstances As Brandin continues into historical and fantasy tales eclectic characters are brought to the forefront as a statistics professor attempts to beat the odds on airplane bombs an attempt is made to reengineer the wings of chickens Chicago politicians struggle with a plan to reduce gang warfare and a robot wonders whether sex is possible In his final section Brandin chronicles the life story of a small boy cursed by Lord Shiva Wings is a collection of unique short stories that delivers satire humor and surprise endings as a group of wide ranging personalities try to overcome lifes most challenging obstacles **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress. Broadband Access Networks Leif Aarthun Ims,2012-12-06 The access network is expected to be one of the major battlegrounds of telecommunications network operators since upgrades of the existing narrowband access network will be the critical factor in supplying multimedia broadband services in a competitive market The future broadband access network architecture needs to be flexible enough to efficiently support the provision of a full set of broadband and narrowband

services with a wide range of capacity demands A wide range of broadband access technologies are available Furthermore the key issues in the upgrading of the very cost sensitive access network are financial as well as technological both for incumbent and new entrant operators Thus in order to identify minimum risk introductory strategies the economic viability of access network broadband upgrades needs to be carefully assessed However despite the definite need for techno economic evaluations very few books have been published in this field One of the reasons might be that broadband access network upgrading only very recently gained wide recognition as a key challenge for broadband delivery Secondly this kind of strategic work and these studies tend to be considered rather sensitive by operators and thus both results and methodologies are not usually readily available Thirdly the work reported in this book in many respects was a major pioneering effort which quite ambitiously aimed at modelling the whole life cycle costs and revenue streams of access network upgrades as opposed to several other efforts which often are limited to pure investment cost comparisons

Boating ,2008-03 **Low Power VCO Design in CMOS** Marc Tiebout,2006-01-25 This work covers the design of CMOS fully integrated low power low phase noise voltage controlled oscillators for telecommunication or datacommunication systems The need for low power is obvious as mobile wireless telecommunications are battery operated As wireless telecommunication systems use oscillators in frequency synthesizers for frequency translation the selectivity and signal to noise ratio of receivers and transmitters depend heavily on the low phase noise performance of the implemented oscillators Datacommunication systems need low jitter the time domain equivalent of low phase noise clocks for data detection and recovery The power consumption is less critical The need for multi band and multi mode systems pushes the high integration of telecommunication systems This is offered by sub micron CMOS featuring digital exibility The recent crisis in telecommunication clearly shows that mobile hand sets became mass market high volume consumer products where low cost is of prime importance This need for low cost products livens tremendously research towards CMOS alternatives for the bipolar or BiCMOS solutions in use today

Spacecraft Structures J. Jaap Wijker,2008-01-08 Space flight is a comprehensive and innovative part of technology It encompasses many fields of technology This monograph presents a cross section of the total field of expertise that is called space flight It provides an optimal reference with insight into the design construction and analysis aspects of spacecraft The emphasis of this book is put on unmanned space flight particularly on the construction of spacecraft rather than the construction of launch vehicles
