Teaching Without Bells Joey Feldman,2016-01-08 Small schools have the potential to fundamentally change the conditions of teaching and learning when practitioners deliberately exploit smallness and recognize relationships as a powerful mechanism for improving student achievement Feldman explains the dynamics of teaching in a small high school what having fewer students in a school affords teachers as well as the challenges for teaching that exist alongside the opportunities based on research teacher interviews and the author s own experiences as a practitioner in both small and large schools This book is for any educator or researcher who wants to better understand the kind of promising practices and professional norms that have been nurtured under conditions of smallness Being informed about what is possible and often facilitated in small schools will enable educators to better reflect on their own practice consider certain pedagogical strategies against the organizational characteristics of schools and make educated career choices Armed with this information educators and researchers can become more focused in their advocacy efforts and more empowered to improve our public high schools whether by redesigning them into small schools or by transplanting and translating small school practices and strategies

Leading from the Inside Out David Grubb,Lynda Tredway,2015-12-03 This book proposes that the collective responsibility of teachers as classroom and school leaders working together to solve their own problems provides the fulcrum of school change It makes the case that teachers and school leaders do not operate in a vacuum but rather they work within the larger context of policy and other social influences Grubb and Tredway provide the building blocks of history policy and social analysis that are necessary if teachers are to be effective in the collective school a place where adults thrive as learners and are able to co create joyful learning experiences for children and youth By encouraging teachers to move out of the individual classroom and to think critically and institutionally about the schools they would like to work in about their own responsibilities for creating such schools about the range of policies from outside the school and how they can influence those policies rather than being subjected to them this book shows that a teacher s influence is not limited to the classroom and students but can significantly shape and inform external policies and decisions
