Psycho-social Explorations of Trauma, Exclusion and Violence Christopher Scanlon, John Adlam, 2022-01-06 The central theme of this book is the operation of intersecting discourses of power privilege and positioning as they are revealed in fraught encounters between in groups and out groups in our deeply fractured world The authors offer a unique perspective on inter group dynamics and structural violence at local societal cultural and global levels dissecting processes of toxic othering and psychosocial re traumatisation The book offers the Diogenes Paradigm as a unique conceptual tool with which to analyse the ways in which those of us who come to be located outside or on the margins of dominant social structures are in one way or another the inheritors of the legacies of centuries of oppression and exclusion This analysis offers a distinctive psycho social redefinition of trauma that foregrounds the relationship between the inhospitable environments we generate and the experiences of unhousedness that we thereby perpetuate Written in an engaging and accessible style Psycho social Explorations of Trauma Exclusion and Violence directly addresses pressing global issues of racial trauma human mobility and climate disaster and offers a manifesto for the creative re imagining of the places and spaces in which conversations about restructuring and reparation can become sustainable This is an essential and compelling book for anyone committed to social justice especially for all practitioners working in health social care and community justice settings and researchers and academics across the behavioural and social sciences

Shmuel

Erlich,2018-05-01 The book bridges the conceptual and practical gap between a psychoanalytic focus on the internal world and the dynamics of external reality by examining an array of junctures in which the two perspectives combine to enrich each other Starting from the inherent bias of the psychoanalytic immersion in working with the internal world the book deals with a wide array of phenomena in which a binocular perspective is potentially contributing One such bridge is exemplified by the Group Relations approach which richly combines psychoanalytic insights with systemic ones This unique merger is valuable in studying a variety of phenomena both within psychoanalysis and outside it The work of the analyst in the psychoanalytic setting implies situating oneself on several boundaries internal and external love and admiration as well as death and destructive impulses and the courage and sacrifice demanded by taking up this role This binocular perspective has significant implications for the formation and maintenance of identity and particularly for the psychoanalytic identity
