Vostro 325:

Claiming and Making Muslim Worlds Jeanine Elif Dağyeli, Claudia Ghrawi, Ulrike Freitag, 2021-07-05 To what extent can Islam be localized in an increasingly interconnected world The contributions to this volume investigate different facets of Muslim lives in the context of increasingly dense transregional connections highlighting how the circulation of ideas about Muslimness contributed to the shaping of specific ideas about what constitutes Islam and its role in society and politics Infrastructural changes have prompted the intensification of scholarly and trade networks prompted the circulation of new literary genres or shaped stereotypical images of Muslims This in turn had consequences in widely differing fields such as self representation and governance of Muslims The contributions in this volume explore this issue in geographical contexts ranging from South Asia to Europe and the US Coming from the disciplines of history anthropology religious studies literary studies and political science the authors collectively demonstrate the need to combine a translocal perspective with very specific local and historical constellations The book complicates conventional academic divisions and invites to think in historically specific translocal contexts

Software Ecosystems Slinger Jansen, Michael A. Cusumano, Sjaak Brinkkemper, 2013-01-01 This book describes the state of the art of software ecosystems It constitutes a fundamental step towards an empirically based nuanced understanding of the implications for management governance and control of software ecosystems This is the first book of its kind dedicated to this emerging field and offers guidelines on how to analyze software ecosystems methods for managing and growing methods on transitioning from a closed software organization to an open one and instruments for dealing with open source licensing issues product management and app stores It is unique in bringing together industry experiences academic views and tackling challenges such as the definition of fundamental concepts of software ecosystems describing those forces that influence its development and lifecycles and the provision of methods for the governance of software ecosystems This book is an essential starting point for software industry researchers product managers and entrepreneurs
