Paths to a Green World, second edition Jennifer Clapp, Peter Dauvergne, 2011-03-11 A new edition of a book that takes a comprehensive look at the ways economic processes affect global environmental outcomes. This comprehensive and accessible book fills the need for a political economy view of global environmental politics, focusing on the ways international economic processes affect environmental outcomes. It examines the main actors and forces shaping global environmental management, particularly in the developing world. Moving beyond the usual emphasis on international agreements and institutions, it strives to capture not only academic theoretical debates but also views on politics, economics, and the environment within the halls of global conferences, on the streets during antiglobalization protests, and in the boardrooms of international agencies, nongovernmental organizations, and industry associations. The book maps out an original typology of four contrasting worldviews of environmental change: those of market liberals, institutionalists, bioenvironmentalists, and social greens, and uses them as a framework to examine the links between the global political economy and ecological change. This typology provides a common language for students, instructors, and scholars to discuss the issues across the classical social science divisions. The second edition of this popular text has been thoroughly revised and updated to reflect recent events, including the food crisis of 2007-2008, the financial meltdown of 2008, and the Copenhagen Climate Conference of 2009. Topics covered include the environmental implications of globalization, wealth, poverty, and consumption, global trade, transnational corporations, and multilateral and private finance.

Transoceanic Perspectives in Amitav Ghosh's Ibis Trilogy Juan-José Martín-González, 2021-06-23 Transoceanic Perspectives in Amitav Ghosh's Ibis Trilogy studies Ghosh's Sea of Poppies 2008 River of Smoke 2011 and Flood of Fire 2015 in relation to maritime criticism Juan José Martín González draws upon the intersections between maritime criticism and

postcolonial thought to provide via an analysis of the Ibis trilogy alternative insights into nationalism's cosmopolitanism and globalization. He shows that the Victorian age in its transoceanic dimension can be read as an era of proto globalization that facilitates a materialist critique of the inequities of contemporary global neo liberalism. The book argues that in order to maintain its critical sharpness postcolonialism must re-direct its focus towards today's most obvious legacy of nineteenth century imperialism: capitalist globalization. Tracing the migrating characters who engage in transoceanic crossings through Victorian sea lanes in the Ibis trilogy, Mart n Gonz lez explores how these dispossessed collectives made sense of their identities in the Victorian waterworlds and illustrates the political possibilities provided by the sea crossing and its fluid boundaries.
