Vrouw En Maatschappij:

De vrouw in de maatschappij Silvia,1888 *De vrouw beslist* Vilan van de Loo,2005 Geschiedenis van het feminisme en de vrouwenemancipatie in de jaren zestig en zeventig in Nederland *In de opleiding der vrouwen ligt de toekomst der maatschappij* ,1872 **De Vrouw, de vrouwenbeweging en het vrouwenvraagstuk** C. M. Werker-Beaujon, Clara Wichmann, W. H. M. Werker, 1914 N 14 met oranje linnen band is een Editie voor de Ned Ver van Huisvrouwen **De vrouw en het Socialisme** August Ferdinand Bebel, 1897 *Mensch en maatschappij* ,1926 *Basisboek obstetrie- en gynaecologie verpleegkunde* ,2000 **De vrouw en het socialisme (De vrouw in het verleden, in het heden en in de toekomst), benevens** August Bebel, Sophie Nadejde, Paul Lafargue, Clara Zetkin, Aloys Petzler, 1891 **Nationale Tentoonstelling van Vrouwenarbeid** ,1898 *De opvoeding der vrouw* Constant, 1876 **De vrouw** F. van Goudoever, 1889 *The dynamics of feminisation* Natalie Verelst, 2025-08-14 In this book feminisation the marking of female sex on personal nouns in Dutch and German is investigated contrastively diachronically and corpus linguistically The corpus based approach entails a theoretical and methodological shift from a structuralist and essentialist approach to the interplay of language and sex to a poststructuralist usage based and holistic perspective which has long been lacking from the scientific domain of Gender Linguistics Starting from the observation that feminising morphology seems less frequently used in Dutch than in German in the same contexts the goal is to examine how intra and extralinguistic factors influence the choice for or against the use of these morphological patterns These only partly consciously made choices are called differentiation and neutralisation respectively On the intralinguistic level the link between the use of feminising morphology and properties of the grammatical gender system is investigated contrastively and diachronically as well as more generally various semantic and pragmatic factors semantics of the personal noun animacy referentiality that may contribute to a more or less stable feminisation system On the extralinguistic level the effect of diverging views on gender fair language use in both language areas and within the respective areas North vs South for Dutch East vs West for German stands out Drawing on diachronic corpus data the effects of these factors are investigated empirically in three case studies by focusing on the form Case Study I and function Case Study II feminisation in human reference and Case Study III feminisation in nonhuman reference of feminising morphology Both formally and functionally Dutch feminisation is a complex system whereas the German one is more uniform and straightforward The use of feminising morphology in Dutch has been restricted since at least the second half of the 20th century but less so in Northern than in Southern Belgian Dutch By contrast the tendency in German goes toward the consolidation of the feminisation system in all semantically female contexts with the exception of language use in former East German newspapers Furthermore as opposed to the Dutch feminisation system the German system has taken on inflectional properties known as inherent inflection the marking of which is semantically motivated Examples of the use of feminising morphology in nonhuman reference fit in this analysis as well e g die Partei als Gewinnerin

the party as the winner fem Significant impacting factors in the reduction of a feminisation system are indeed the gender system feminisation is connected with a preserved masculine feminine gender distinction present in German but not in Dutch referentiality feminisation is an important referent tracking instrument and therefore more likely found in referential contexts semantics in the case of reduction of feminisation remnants of the system are observed in semantic contexts which foreground social gender the newness of a personal noun in a language neutralisation of new nouns is more common than neutralisation of long established nouns and the influence of language policy the Dutch feminisation system as well as the use of feminising morphology in the former GDR has been subject to a significant effect of conscious neutralisation strategies as a means of gender fair language use *Rederijkers weekblad* , Studenten-weekblad ,1871 *The Great, the New and the British* Hans Righart,2000 History of the Low Countries J. C. H. Blom,E. Lamberts,2006-06 The history of the smaller European countries is rather neglected in the teaching of European history at university level We are therefore pleased to announce the publication of the first comprehensive history of the Low Countries in English from Roman Times to the present Remaining politically and culturally fragmented with its inhabitants speaking Dutch French Frisian and German the Low Countries offer a fascinating picture of European history en miniature For historical reasons parts of northern France and western Germany also have to be included in the Low Countries a term that must remain both broad and fluid a convenient label for a region which has seldom if ever composed a unified whole In earlier ages it as even more difficult to the region set parameters again reflecting Europe as a whole when tribes and kingdoms stretched across expanses not limited to the present states of Belgium Luxembourg and the Netherlands Nevertheless its parts did demonstrate many common traits and similar developments that differentiated them from surrounding countries and lent them a distinct character Internationally the region often served both as a mediator for and a buffer to the surrounding great powers France Britain and Germany an important role still played today as Belgium and the Netherlands have increasingly become involved in the broader process of European integration in which they often share the same interest and follow parallel policies This highly illustrated volume serves as an ideal introduction to the rich history of the Low Countries for students and the generally interested reader alike

The Sociology of Norbert Elias Steven Loyal,Stephen Quilley,2004-03-18 This book provides a comprehensive and accessible introduction to the key aspects of Norbert Elias s work **EU Non-Discrimination Law in the Courts** Jule Mulder,2017-01-12 Since the year 2000 the material and personal scope of EU non discrimination law has been significantly broadened and has challenged national courts to introduce a comprehensive equality framework into their national law to correspond with the European standard The book provides a multi layered culturally informed comparison of juridical approaches to EU in direct sex and sexualities discrimination and its implementation in Germany and the Netherlands It examines how and why national courts apply national non discrimination law with a European origin differently although the legislation derives from the same set of EU law and the national courts have to respect the interpretive competence of the

CJEU The book provides valuable insights into the national and European context which shape the dialogue and influences of the courts inter se the national application of EU law and the harmonisation process within the area of gender equality law and beyond A Dutch and German comparison is of special interest here because both countries approaches towards non discrimination law are quite different despite the similarities in the respective legal systems they are founding members of the EU they are neighbours they are civil law countries and their legal systems are relatively similar at least compared to Scandinavian and common law jurisdictions Therefore the different reception EU non discrimination law cannot simply be explained by obvious differences between the legal systems Their comparison thus provides an interesting case study to uncover legal and non legal cultural and historic factors which influence the application of EU non discrimination law in both countries The book is of interest for EU comparative and equality lawyers **Het persoonlijke wordt politiek** Irene Costera Meijer, 1996 Studie over de bewustwording van vrouwen tijdens de tweede feministische golf waarin vrouwen op zoek gingen naar hun authentieke vrouwelijke ik Die zoektocht nam steeds radicaler vormen aan met als gevolg dat veel vrouwen een politieke keuze voor homoseksualiteit maakten en dat lesbische vrouwen zich tot de priesterkaste van het feminisme opwierpen *De geschiktheid der vrouw voor de uitoefening der geleerde beroepen*, 1899
