*Venice & Vitruvius* Margaret Muther D'Evelyn, 2012 In about 35 B C E the Roman architect Vitruvius produced his encyclopedic ten book summary of the principles of Hellenistic architecture *De architectura* On Architecture These ideas have stimulated architects ever since In the mid 16th century the architect Andrea Palladio 1508 1580 and the humanist Daniele Barbaro 1513 1570 looked to the city of Venice in order to understand and interpret Vitruvius s text still in need of clarification which would enable them to solve contemporary architectural problems They found in the city s medieval and Renaissance streets palaces churches and towers living principles that enabled them to interpret the ancient principles By 1556 Barbaro had incorporated their observations into his *Commentaries on Vitruvius* and two distinctly new editions for different audiences followed a decade later Margaret D Evelyn has gathered evidence to document how Palladio s understanding of Vitruvius influenced Barbaro This engrossing volume also charts the invention of the illustrated architectural book and how major architect authors such as Leon Battista Alberti and Sebastiano Serlio contributed to its development demonstrating how Vitruvius shaped the way the city of Venice was viewed *Vincenzo Scamozzi and the Chorography of Early Modern Architecture* AnnMarie Borys, 2017-07-05 The first English language overview of the contributions to Renaissance architectural culture of northern Italian architect Vincenzo Scamozzi 1548 1616 this book introduces Anglophone architects and historians to a little known figure from a period that is recognized as one of the most productive and influential in the Western architectural tradition Ann Marie Borys presents Vincenzo Scamozzi as a traveler and an observer the first Western architect to respond to the changing shape of the world in the Age of Discovery Pointing out his familiarity with the expansion of knowledge in both natural history and geography she highlights that his truly unique contribution was to make geography and cartography central to the knowledge of the architect In so doing she argues that he articulated the first fully realized theory of place Showing how geographic thinking influences his output Borys demonstrates that although Scamozzi s work was conceived within an established tradition it was also influenced by major cultural changes occurring in the late 16th century *Pliny the Elder and the Emergence of Renaissance Architecture* Peter Fane-Saunders, 2016-07-12 The *Naturalis historia* by Pliny the Elder provided Renaissance scholars artists and architects with details of ancient architectural practice and long lost architectural wonders material that was often unavailable elsewhere in classical literature Pliny s descriptions frequently included the dimensions of these buildings as well as details of their unusual construction materials and ornament This book describes for the first time how the passages were interpreted from around 1430 to 1580 that is from Alberti to Palladio Chapters are arranged chronologically within three interrelated sections antiquarianism architectural writings drawings and built monuments thereby making it possible for the reader to follow the changing attitudes to Pliny over the period The resulting study establishes the *Naturalis historia* as the single most important literary source after Vitruvius s *De architectura* *Groundwork* David Young Kim, 2022-10-18 An

illuminating look at a fundamental yet understudied aspect of Italian Renaissance painting The Italian Renaissance picture is renowned for its depiction of the human figure from the dramatic foreshortening of the body to create depth to the subtle blending of tones and colors to achieve greater naturalism Yet these techniques rely on a powerful compositional element that often goes overlooked Groundwork provides the first in depth examination of the complex relationship between figure and ground in Renaissance painting Ground can refer to the preparation of a work s surface the fictive floor or plane or the background on which figuration occurs In laying the material foundation artists perform groundwork opening the ground as a zone that can precede penetrate or fracture the figure David Young Kim looks at the work of Gentile da Fabriano Giovanni Bellini Giovanni Battista Moroni and Caravaggio reconstructing each painter s methods to demonstrate the intricacies involved in laying ground layers whose translucency and polychromy permeate the surface He charts significant transitions from gold ground painting in the Trecento to the darkened grounds in Baroque tenebrism and offers close readings of period texts to shed new light on the significance of ground forms such as rock face wall and cave This beautifully illustrated book reconceives the Renaissance picture revealing the passion and mystery of groundwork and discovering figuration beyond the human figure

**Citation and Quotation in Early Modern Architecture** Andrew Hopkins, 2024-11-18 Citare in Italian means both to cite and to quote Citazione means both citation and quotation This volume with many discussions of annotations or marginal notes postils aims to tease out one of the principal threads of the over arching theme of what might be termed Lost and Found in Translation with regard to Early Modern Architecture Citation of texts in relation to Early Modern architectural design treatise writing and theory has long been studied but mostly in ways which have never clearly distinguished between three important but different terms mindset citation and quotation This volume charts citation from Filarete and ancient descriptions of Near Eastern Architecture to difficulties in understanding Vitruvius and Lost and found in Fra Giocondo s Vitruvius The investigation then broadens to Tracing Renaissance Italian Architectural Books in colonial Mexico and an examination of reverse ekphrasis and Early Modern Architecture It then turns to twisted words and borrowed wisdom misleading citation in Scamozzi s *Idea dell architettura universale* 1615 before heading East to discuss formats and functions of large scale calligraphy in late Ming and Qing period China and the reconstruction of architectural spaces Turning to Quotation the investigation begins with Pirro Ligorio the Megala ship and the Cortile del Belvedere and invention imitation and reiteration the case of Bramante s Palazzo Caprini and its progeny Then follows Quoting from memory centralized models and basilica systems in early counter reformation Venice followed by Borrominismo in eighteenth century Lisbon and old form with new function Villa Emo Amtshaus W rltz and concludes with found and reshaped in translation architectural models between centre and periphery An important reading for anybody interested in Early Modern Architecture
