Venice In Environmental Peril Myth And Reality:

Venice in Environmental Peril? Dominic Standish, 2011-12-14 Venice and its environment are perceived to be in peril due to rising sea levels tourism and modern development Are these threats myths or reality This book explores Venice s environmental risks based on interviews with Venetian environmental campaigners and draws on the mythology of the Venetian Republic Campaigners opinions about the mobile dams nearing completion to protect the city reveal that Venice now represents an environmentally threatened retreat from modernity This reputation has been established as sustainable development and climate change policies have risen to the top of political agendas in many cities and countries The book investigates how environmentalism has been transformed from a theory underpinning counter cultural movements to part of a dominant holistic culture in Western societies Rather than constraining Venice in search of a mythical harmony with nature this book offers a ten point proposal to modernize the city while preserving its ancient heritage **Venice in**

Ally, Damon Boria, 2023-03-16 Earthly Engagements Reading Sartre after the Holocene brings together scholars from the Sartre studies community to think through the planetary ecological crisis Edited by Matthew C Ally and Damon Boria the collection explores ways in which Sartre s existential thought can be read socio ecologically illuminating the tightly imbricated earthly and worldly crises of our post Holocene epoch Contributors variously discuss phenomenology ethics politics ontology and metaphysics Earthly locations include the Icelandic coast the Minnesota woods the Indiana Dunes the Chinese Great Plain the Venetian Lagoon and more worldly situations include that of the artist the activist the consumer the tourist and more Through their diversity of methods and substantive concerns the chapters reveal a wealth of critical and heuristic resources within Sartre s thought for thinking through and engaging the planetary ecological crisis and its direct ties to global social economic and political crises In full recognition of Sartre s personal distaste for agrarian settings and wilderness and some ostensibly anti environmental philosophical and literary moments the contributors take the proper Sartrean line that how we view nature and our relationship to nature is neither closed nor predetermined Like life itself our

worldly relationship to earthly nature is rooted in the sufficiency and open endedness of freedom **Tourism's Horizon** Jim Butcher, 2025-10-06 Drawing on the work of internationally renowned scholars and experts this volume provides a provocative stimulating and challenging exploration of the future of tourism in the context of growing global mobility environmental challenges and social shifts Why Cities Look the Way They Do Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original Why Cities Look the Way They Do will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention **The Erosion of the American Sporting Ethos ... Reconsidered** Joel Nathan Rosen, 2021-01-01 This work examines American sport from its traditional roots to the influence of the 1960s era counterculture and the rise of a post Cold War ethos that reinterprets competition as a relic of a misbegotten past and anathema to American life **The Writing of Natural Disaster in Europe, 1500-1826** Sandhya Patel, Sophie Chiari, 2022-12-12 This book explores reactions to and representations of natural disasters in early modern Europe The contributors illustrate how the cultural production of the period in manuals treatises sermons travelogues and fiction grappled with environmental catastrophe Crucially they interrogate how people in the early modern era rationalized and mediated the threat of events like plagues great frosts storms floods and earthquakes A vital contribution to environmental history this book highlights the parallels between early modern responses to natural disaster and climate anxiety in our own era **A Future in Ruins** Lynn Meskell, 2018-06-01 A Future in Ruins is an eye opening look at the United Nations Educational Scientific and Cultural Organization UNESCO Focusing on early luminaries like H G Wells Aldous and Julian Huxley with their dystopian fears for the future through to the devastation of ancient sites like Cuzco Abu Simbel the Bamiyan Valley and Palmyra the book traces how from 1945 to the present cultural heritage has been a vital part of the elusive hope for a better world *Rethinking Heritage for Sustainable Development* Sophia Labadi, 2022-06-06 The Sustainable Development Goals SDGs adopted by the UN in 2015 have influenced the actions of international and intergovernmental organisations and governments around the world and have dictated priorities for international aid spending Culture including heritage is often presented as fundamental to addressing

the SDGs since 2010 the United Nations has adopted no fewer than five major policy recommendations that assert its importance as a driver and enabler of development Yet heritage is marginalized from the Sustainable Development Goals Rethinking Heritage for Sustainable Development constitutes a substantial and original assessment of whether and how heritage has contributed to three key dimensions of sustainable development namely poverty reduction gender equality and environmental sustainability within the context of its marginalisation from the Sustainable Development Goals and from previous international development agendas Sophia Labadi adopts a novel inclusive large scale and systematic approach providing the first comprehensive history of the international approaches on culture including heritage for development from 1970 to the present day This book is also the first to assess the negative and positive impacts of all the international projects implemented in sub Saharan Africa by a consortium of UN organisations that aimed to provide evidence for the contribution of heritage for development in time for the negotiation of the SDGs The book s conclusions provide recommendations for rethinking heritage for development while reflecting on the major shortcomings of the selected projects More than Cricket and Football Joel Nathan Rosen, Maureen M. Smith, 2016-12-02 Contributions by Lisa Doris Alexander Sean Bell Benn L Bongang Joel S Franks Silvana Vilodre Goellner Annette R Hofmann Dong Jinxia Cl udia Samuel Kessler Jack Lule Li Luyang Mark Panek Roberta J Park Gamage Harsha Perera Joel Nathan Rosen Viral Shah Maureen M Smith Nancy E Spencer Dominic Standish Tim B Swartz Dan Travis Theresa Walton Fisette and Zhong Yijing Given the presumed dominance of American sport many fans throughout the hemisphere find it difficult to envision the role of sport beyond the confines of their own continent And yet world sport consists of so much more than the games Americans play and so much more than the stereotype of cricket for the elite and football for the working class As worldwide sport continues to gain in popularity we also see parallels to many aspects visible in North American sport particularly celebrity and all its trappings and pitfalls The success of athletes from other countries in basketball and ice hockey and the proliferation of stars imported and now exported to and from North America provides some better examples of sport s international power It also creates a very new kind of sport celebrity albeit one that often shows a rather limited reach beyond that star s own country or continent Thus rather than focusing on the Western Hemisphere this collection of some of world sport s most heralded celebrities including stars of Motocross surfing distance running and more serves as a sort of passport to many places that make up our global sporting environment Resisting James Bond Christoph Lindner, Lisa Funnell, 2023-06-15 Beginning with Casino Royale 2006 and ending with No Time to Die 2021 the Daniel Craig era of James Bond films coincides with the rise of various justice movements challenging deeply entrenched systems of inequality and oppression ranging from sexism racism and immigration to 2SLGBTQIA rights reproductive justice and climate change While focus is often placed on individual actions and institutional policies and practices it is important to recognize the role that culture plays within these systems Mainstream film is not simply mindless entertainment but a key part of a global cultural industry that naturalizes and normalizes power

structures Engaging with these issues Resisting James Bond is a multidisciplinary collection that explores inequality and oppression in the world of 007 through a range of critical and theoretical approaches The chapters explore the embodiment and disembodiment of power and privilege across the formal narrative cultural and geopolitical elements that define the revisionist reversionist world of Daniel Craig's Bond *Il giocattolo del mondo* Robert C.
