Tilting Newfoundland:

Dictionary of Newfoundland English George Morley Story, W. J. Kirwin, John David Allison Widdowson, 1990-01-01 First published in 1982 to international acclaim the Dictionary of Newfoundland English introduced the world to an incredibly rich dialect with deep roots in Ireland and the English West Country *Tilting* Robert Mellin, 2003-01-31 Tilting is author Robert Mellin's personal account of the houses outbuildings furniture tools fences docks and way of life of a fishing village on a small island far off the Canadian coast Part journal part sketchbook part oral history Tilting is a treasure chest of a book that offers new discoveries with each reading and a reminder of the simpler aspects of life and building *Erin's Sons* Terrence M. Punch, 2008 From the time of the earliest European colonies there were Irish settlers in the four provinces of Atlantic Canada Newfoundland and Labrador Prince Edward Island New Brunswick and Nova Scotia Despite the flow of Irish through Atlantic Canada the early records of these immigrants are fewer and less informative than those of New England and New York from the same period Erin's Sons Irish Arrivals in Atlantic Canada 1761-1853 goes a long way toward rectifying this problem Author Terrence M Punch has combed through a wide ranging and disparate group of sources including newspaper articles and advertisements local government documents and census records church records burial records land records military records passenger lists and more to identify as many of these pioneers as possible and disclose where they came from in the Old Country These sources often contain details that cannot be found in Irish records where few census returns survived from before 1901 and where Catholic records began a generation or more after their counterparts in Atlantic Canada Islands Magazine, 2003-03 Memoir, 1910 Single-Handedly Nalina Moses, 2019-05-07 Part of the generation of architects who were trained to draw both by hand and with digital tools Nalina Moses recently returned to hand drawing Finding it to be direct pleasurable and intuitive she wondered whether other architects felt the same way Single Handedly is the result of this inquiry An inspiring collection of 220 hand drawings by more than forty emerging architects and well known practitioners from around the world this book explores the reasons they draw by hand and gives testimony to the continued vitality of hand drawing in architecture The powerful yet intimate drawings carry larger propositions about materials space and construction and each one stands on its own as a work of art The Human Shore John R. Gillis, 2022-12-22 Since before recorded history people have congregated near water But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels our relationship to the sea has begun to take on new and potentially catastrophic dimensions The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them the natural environment and the need to live sustainably on the world's shores Humanity has forgotten how to live with the oceans In *The Human Shore* a magisterial account of 100 000 years of seaside civilization John R Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts He takes readers

from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind s changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal The Human Shore is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land s end

Our Rural Selves Claudia Mitchell,April Mandrona,2019-04-26 Life in the countryside often perceived as either idyllic or depleted has long been misrepresented Challenging the stereotypes and myths that surround the idea of rurality Our Rural Selves interrogates and represents individual and collective memories of childhood in rural landscapes and small towns Drawing on visual artifacts whose origins range from the early twentieth century to today such as photographs films objects picture books and digital games contributors offer readings of childhood that are geographically ethnically and culturally diverse They examine the memories of Indigenous children the experiences of back to the land youth and boom or bust childhoods within the petroleum farming and fishing industries Illustrating often neglected and overlooked aspects of adolescence this collection suggests new ways of studying social connectedness and collective futures Innovative and revealing in its use of visual studies autoethnography and memory work Our Rural Selves

explores representation imagination and what it means to grow up rural in Canada **Architecture Follows Fish** Andre Tavares, 2024-10-29 A highly original exploration of the history of architecture in relation to fish shedding light on the connection between marine environments and terrestrial landscapes Architecture Follows Fish is set in the North Atlantic and its protagonist is fish In this book author and architect Andr Tavares explores the notion of fishing architecture a concept coined to describe architectural practices that are spawned by fisheries To encompass the scope of fishing architecture and to establish the connections between marine ecology and architectural practice the book oscillates between different continents centuries and species Fisheries are unique and this book sheds light on that uniqueness through an articulated narrative and a wealth of iconography Up until now there has been no history of architecture from the perspective of fish although there are counterparts for meat timber oil and many other industries Tavares provides a counternarrative to the traditional history of marine environments which tends to focus on water ecosystems and instead forms a bridge between what happens at sea and what happens on land The hope is that after reading this book readers will better understand life in the sea in relation to urban growth and terrestrial landscapes
