

TIRE SIZE EXPLAINED

TIRE WIDTH

This three-digit number represents the width of the tire's footprint (from shoulder to shoulder), measured in millimeters. In this case, the tire width is 245 mm.

ASPECT RATIO

The second number is the height of the sidewall, measured as a percentage of the tire width. When the aspect ratio is 70 that means the sidewall height is 70% of the tire width.

RIM DIAMETER

The last number of the tire size indicates the size of the wheel needed for the tire.

This is measured in inches, from bead to bead across the face of the wheel.

Here the tire has to be mounted on a 17-inch wheel.

LOAD INDEX

The load index is the number that shows the load durability of a specific tire, determined by the tire size and the psi levels.

Tires with higher load indexes can handle larger loads.

SPEED INDEX

The speed rating is the letter located after the load index. It represents the maximum speed a tire can safely handle, without the possibility of tire failure.
