Transitioning Children with Autism from One-on-one Discrete-trial Settings to Special Education Classrooms Jennifer L. Freeman, 2016 The goal of an early intensive behavioral intervention EIBI program is to teach each child the skills necessary to make meaningful progress in less restrictive environments Fox Dunlap Crushing 2002 However few studies have detailed the steps necessary for a successful transition into these educational settings We transitioned two children who received 20 hours a week of one on one discrete trial therapy and attended a half day special education pre school classroom to a full time educational setting With the goal of aiding each during his/her transition this study used the Verbal Behavior Milestones Assessment and Placement Program VB MAPP Sundberg 2008 particularly the barriers and transitions assessments to evaluate each child's strengths deficits and barriers We also collaborated with their teachers to collect classroom expectations and recommended pre requisite skills Our intervention focused more on teaching commonly used classroom skills and barrier reduction and less on the acquisition of additional academic skills All targeted skills except Cooper's transitions transferred from the one on one setting to his/her new classroom after some followup classroom staff training Also we did intervene to decrease Cooper's flops during transitions in his kindergarten classroom **The Wisdom Factor** Alice Darnell Lattal, Carlos A Zuluaga, 2022-05-31 The Wisdom Factor is about how you show up what you say and do and the legacy you leave Using science and experience the authors describe how a river of reciprocity connects us Individual behavior holds the transformational power to create change even in tough times Assessing your effects by your actions is at the heart of this book The strategies can help you build a better world Watch the ripple effect
