Vednta Philosophy Five Lectures On Reincarnation:

Vedanta Philosophy Swami Abhedananda, 2004-10 The visible phenomena of the universe are bound by the universal law of cause and effect The effect is visible or perceptible while the cause is invisible or imperceptible The falling of an apple from a tree is the effect of a certain invisible force called gravitation Although the force cannot be perceived by the senses its expression is visible All perceptible phenomena are but the various expressions of different forces which act as invisible agents upon the subtle and imperceptible forms of matter These invisible agents or forces together with the imperceptible particles of matter make up the subtle states of the phenomenal universe When a subtle force becomes objectified it appears as a gross object Therefore we can say that every gross form is an expression of some subtle force acting upon the subtle particles of matter The minute particles of hydrogen and oxygen when combined by chemical force appear in the gross form of water Water can never be separated from hydrogen and oxygen which are its subtle component parts Its existence depends upon that of its component parts or in other words upon its subtle form If the subtle state changes the gross manifestation will also change The peculiarity in the gross form of a plant depends upon the peculiar nature of its subtle form the seed *Vedānta Philosophy* Swami Abhedānanda, 1907 **Vedānta Philosophy** Abhedānanda (Swāmi.), 1902
