,2000 *The Power Supply Industry* Panos Konstantin,Margarete Konstantin,2018-01-11 Power and Energy industry is a
highly capital intensive business field Furthermore there is a very close interlinkage between technologies and economics
that requires engineering consultants economists and lawyers dealing with investments in this field to have a basic
knowledge of the power sector technologies and a common understanding of project evaluation approaches and

methodologies The book's overall objective is to provide a comprehensive but concise coverage of power supply technologies and the related economics as required for techno-economic evaluation of investments in power and business projects Throughout the book the emphasis is on transferring practical know-how rather than pure theoretical knowledge This is also demonstrated in numerous examples derived from experience of respective projects The book comprises eleven chapters 35 tables 100 figures 35 application examples and 10 case studies Target audience of the book are primarily international consultants staff members of engineering companies utility personnel energy economists and lawyers as well as employees of government agencies entrusted with regulating the energy and utility sector and finally students in related fields of engineering and economics **Transactions** ,1991 **Diesel Progress North American** ,1981 **200 technical**
