give a visual example of concepts addressed in the text help you visualize difficult material and illustrate how a disorder's multiple symptoms, treatments and side effects are associated. Over 110 skills and steps featuring sample documentation examples and Home Care Considerations boxes where appropriate present step by step procedures in an action rationale format. Life Span Considerations: The Older Adult highlight changes that occur with aging and how they affect nursing care by LPN/LVNs working in community and long term care. Easy to follow reading level and text organization presents information from simple to most complex making it perfect for lower level students and those speaking English as a second language. Numbered objectives divided by theory and clinical practice provide a framework for content. Cultural Considerations cover biocultural variations as well as health promotion for specific ethnic groups so you provide culturally competent care. Health Promotion and Patient Teaching boxes include guidelines to prevent illness, promote health and develop self care strategies. Nursing process framework features application of the nursing process and nursing care plans to reinforce application of the nursing process in the clinical setting. Think Critically boxes encourage you to synthesize information and apply concepts to practice. Home Care Considerations boxes highlight the necessary adaptations of nursing skills and techniques for the patient in the home care setting. Communication boxes present examples of nurse/patient dialogues and instructive therapeutic communication techniques. Over 20 nursing care plans which include critical thinking questions at the end of the text provide you with a model for planning patient care. Clinical chapters provide an overview of structure and function to give you a refresher in related anatomy and physiology including a section on aging. Key terms include phonetic pronunciations which are helpful for ESL students and text page references to find the definition. Standard LPN Threads features include helpful characteristics such as full color design, key terms, numbered objectives, key points, critical thinking questions, critical thinking activities, glossary and references.

Clinical Cases in Paramedicine Sam Willis, Ian Peate, Rod Hill, 2021-02-25. Clinical Cases in Paramedicine provides students, educators and early career paramedics with a diverse range of detailed case studies that realistically represent the conditions, scenarios and challenges encountered in practice. Integrating evidence based cases and expert insights from leading academics and practitioners, this engaging resource helps readers develop appropriate decision making skills and apply theoretical concepts to practical situations. Organised by medical presentations and body systems, the text provides readers with a systematic framework that mirrors how paramedics assess cases in the real world. Throughout the text, cases of varying levels of complexity are designed to meet the needs of Case Based Learning (CBL) and Problem Based Learning (PBL) curricula used in paramedic training programmes worldwide. Each chapter contains six case studies: introductory, intermediate and advanced, and features interactive learning activities, discussion questions, practical tips and authoritative guidance aligned to national and international best practice standards. Case studies illustrate scenarios related to trauma, medical emergencies, obstetrics, respiratory and cardiac events, minor injuries, drug overdoses and many others. This comprehensive resource features case studies of varying lengths and

degrees of complexity to suit different readers from student to professional Suitable for use in many international programmes Offers chapter introductions and summaries practice questions and additional online resources Contains clinical legal ethical cultural remote and rural case studies Includes a cumulative and comprehensive Test Your Knowledge concluding chapter Those studying or working in paramedicine must keep pace with changes in the field using the latest evidence and expert opinion Clinical Cases in Paramedicine is an essential volume for paramedic students and early career professionals as well as educators lecturers and trainers Ham's Primary Care Geriatrics E-Book Gregg A.
