Integrated Water Resources Management in the 21st Century: Revisiting the paradigm Pedro Martinez-Santos,Maite M. Aldaya,M. Ramón Llamas,2014-03-03 Integrated water resources management IWRM advocates a coordinated approach for managing water resources in a way that balances social and economic needs with care for nature While attractive IWRM is both controversial and elusive This book provides a down to earth approach to the elusive concept of integrated water resources management drawing from conceptual frameworks and real life practice to identify the key aspects that are yet to be resolved it examines the role of water accounting food trade environmental externalities and intangible values as key aspects whose resolution will help the IWRM community move forward **Handbook on Water Security** Claudia

Pahl-Wostl,Anik Bhaduri,Joyeeta Gupta,2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security Water Markets for the 21st Century K. William Easter,Qiuqiong Huang,2014-07-30 This book

evaluates the history the present and the future of water markets on 5 continents beginning with the institutional underpinnings of water markets and factors influencing transaction costs The book examines markets in seven countries and three different U S states ranging from village level water markets in Oman to basin wide formal water markets in Australia s Murray Darling River basin Introductory chapters on the background of water markets and on transaction costs and policy

design are followed by chapter length discussion of water markets as an adaptive response to climate change and of supply reliability in a changing climate Case studies describe a variety of facets of the design and function of markets around the world California Chile Spain Oman Australia Canada India and China In analyzing these real world examples of markets the contributors explore water rights and trading of rights between agricultural and urban sectors and the principles and function of option markets They discuss different sized approaches from large scale ministry level administration of markets to informal arrangements among farmers in the same village or groups of villages which allocate water without large investment in management and infrastructure Discussion includes questions of why water market practices have not expanded more rapidly in arid places The book discusses mechanisms for resolving conflicts between water rights holders as well as between water right holders and third parties impacted by water trades and whether or not public ownership of water rights or use rights should trump private ownership and under what condition Also covered are new and expanding categories of water use beyond human consumption agriculture and industry to new technologies ranging from extracting natural gas from shale to producing biofuels The book concludes with suggestions for future water markets and offers a realistic picture of how they might change water use and distribution practices going forward OECD Studies on Water Drying Wells, Rising Stakes Towards Sustainable Agricultural Groundwater Use OECD,2015-09-28 Groundwater has provided great benefits to agriculture irrigation in semi arid OECD countries but its intensive use beyond recharge in certain regions has depleted resources and generated significant negative environmental externalities **Routledge Handbook of the Resource Nexus** Raimund Bleischwitz,Holger Hoff,Catalina Spataru,Ester van der Voet,Stacy D. VanDeveer,2017-12-14 In recent years the concept of the resource nexus has been both hotly debated and widely adopted in research and policy circles It is a powerful new way to understand and better govern the myriad complex relationships between multiple resources actors and their security concerns Particular attention has been paid to water energy and food interactions but land and materials emerge as critical too This comprehensive handbook presents a detailed review of current knowledge about resource nexus related frameworks methods and governance including a broad set of inter disciplinary perspectives Written by an international group of scholars and practitioners the volume focuses on rigorous research including tools methods and modelling approaches to analyse resource use patterns across societies and scales from a nexus perspective It also provides numerous examples from political economy to demonstrate how resource nexus frameworks can illuminate issues such as land grabs mining renewable energy and the growing importance of economies such as China as well as to propose lessons and outlooks for sound governance The volume seeks to serve as an essential reference text source book and state of the art science based assessment of this increasingly important topic the resource nexus and its utility in efforts to enhance sustainability of many kinds and implement the United Nations Sustainable Development Goals in an era of environmental and geopolitical change **Adaptation to Climate Change through Water Resources Management**

Dominic Stucker,Elena Lopez-Gunn,2014-08-27 The impacts of human induced climate change are largely mediated by water such as alterations in precipitation and glacial melt patterns variations in river flow increased occurrence of droughts and floods and sea level rise in densely populated coastal areas Such phenomena impact both urban and rural communities in developed emerging and developing countries Taking a systems approach this book analyzes evidence from 26 countries and identifies common barriers and bridges for local adaptation to climate change through water resources management It includes a global set of case studies from places experiencing increased environmental and social pressure due to population growth development and migration including in Africa Asia Australia Europe North and South America All chapters consider the crosscutting themes of adaptive capacity equity and sustainability These point to resilient water allocation policies and practices that are capable of protecting social and environmental interests whilst ensuring the efficient use of an often scarce resource

Polycentric Water Governance in Spain Nora Schütze,2023-05-25 Increasing irrigation efficiency has been high on the political agenda in Spain for many years However the overarching aim to reduce agricultural water consumption has not been met so far To explore this phenomenon Nora Schütze investigates processes of coordination between the water and agricultural sector in three Spanish river basins in the context of the EU Water Framework Directive implementation From the perspective of polycentric governance she identifies multiple mechanisms which illustrate how and why actors interact in certain ways and thus shows why environmental aims of the Water Framework Directive remain unachieved

Water for Food Security and Well-being in Latin America and the Caribbean Bárbara A. Willaarts,Alberto Garrido,M. Ramón Llamas,2014-04-24 This volume provides an analytical and facts based overview on the progress achieved in water security in Latin America and the Caribbean LAC region over during the last decade and its links to regional development food security and human well being Although the book takes a regional approach covering a vast of data pertaining to most of the LAC region some chapters focus on seven countries Argentina Brazil Chile Colombia Costa Rica Mexico and Peru A full understanding of LAC s trends progress requires framing this region in the global context an ever more globalized world where LAC has an increasing geopolitical power and a growing presence in international food markets The book s specific objectives are 1 exploring the improvements and links between water and food security in LAC countries 2 assessing the role of the socio economic megatrends in LAC

identifying feedback processes between the region's observed pattern of changes regarding key biophysical economic and social variables linked to water and food security and 3 reviewing the critical changes that are taking place in the institutional and governance water spheres including the role of civil society which may represent a promising means to advancing towards the goal of improving water security in LAC The resulting picture shows a region where recent socioeconomic development has led to important advances in the domains of food and water security Economic growth in LAC and its increasingly important role in international trade are intense in terms of use of natural resources such as land water and energy This poses new and important challenges for sustainable development The reinforcement of national and global governance schemes and their alignment on the improvement of human well being is and will remain an inescapable prerequisite to the achievement of long lasting security Supporting this bold idea with facts and science based conclusions is the ultimate goal of the book

Facing the Challenges of Water Governance Simon Porcher,Stéphane Saussier,2018-11-19 Access to water is one of the most pressing global issues of the twenty first century particularly when set against the background of a rapidly growing global population This book provides a cutting edge comprehensive overview of the challenges facing water governance and regulatory choices The recently adopted Sustainable Development Goals set forward an ambitious agenda of providing universal access to good quality water supply and sanitation services within a financially constrained environment however the various peculiarities of each country regarding water governance makes it difficult to identify and implement the best practices and benchmarks Drawing together empirical studies from countries around the world the editors and contributors combine extensive data to review the individual challenges facing each country from the supervision of autonomous regulatory bodies to the question of centralization and the influence of local utility companies This pioneering and practical volume will be of interest and value not only to students and scholars of water governance but also to practitioners and regulators

Water Security Bruce Lankford,Karen Bakker,Mark Zeitoun,Declan Conway,2013-10-15 The purpose of this book is to present an overview of the latest research policy practitioner academic and international thinking on water security an issue that like water governance a few years ago has developed much policy awareness and momentum with a wide range of stakeholders As a concept it is open to multiple interpretations and the authors here set out the various approaches to the topic from different perspectives Key themes addressed include Water security as a foreign policy issue The interconnected variables of water food and human security Dimensions other than military and international relations concerns around water security Water security theory and methods tools and audits The book is loosely based on a masters level degree plus a short professional course on water security both given at the University of East Anglia delivered by international authorities on their subjects It should serve as an introductory textbook as well as be of value to professionals NGOs and policy makers

Irrigation in the Mediterranean François Molle,Carles Sanchis-Ibor,Llorenç Avellà-Reus,2019-05-09 Mediterranean irrigation is diverse due to among other factors the relative importance of water in the economy of each country varied levels of aridity heterogeneous levels

economic social and technological levels of development and differences in political and social organization However most of the Mediterranean countries face similar problems to meet their water demands because of the scarcity and variability of renewable resources growing water requirements from non agricultural sectors increasing environmental concerns related to water quality and environmental degradation a social demand for larger public participation and important technological changes The time has come to reconsider the not one drop lost to the sea philosophy of yesteryears largely and to live within limits This book focuses on eight selected countries Tunisia Morocco Spain France Italy Turkey Israel and Egypt and provides a comparative perspective that both thoroughly explores their specificities and identifies the common challenges faced by the irrigation sector in these countries The book has been written at a critical moment when the continued application of a supply side water management model is revealing its unsustainable nature in numerous places when significant technological changes are taking place in the irrigation sector when new forms of management and governance are widely held as badly needed and finally when climate change is compounding many of the difficulties that have characterized irrigation policies and practices in the past decades This complicated future context makes Mediterranean irrigation face various political dilemmas on water management raising social tensions triggering territorial and land conflicts and stimulating new technological developments This book provides a timely analysis of the particular trajectory of eight Mediterranean countries in these uncertain transformations and attempts to identify the best strategies to avert or overcome future risks

Recipe for a Livable Planet William Sutton,Alexander Lotsch,Ashesh Prasann,2024-10-16 The global agrifood system has been largely overlooked in the fight against climate change Yet greenhouse gas emissions from the agrifood system are so big that they alone could cause the world to miss the goal of keeping global average temperatures from rising above 1.5 centigrade compared to preindustrial levels Greenhouse gas emissions from agrifood must be cut to net zero by 2050 to achieve this goal Recipe for a Livable Planet Achieving Net Zero Emissions in the Agrifood System offers the first comprehensive global strategic framework to mitigate the agrifood system's contributions to climate change detailing affordable and readily available measures that can cut nearly a third of the world's planet heating emissions while ensuring global food security These actions which are urgently needed offer three additional benefits improving food supply reliability strengthening the global food system's resilience to climate change and safeguarding vulnerable populations This practical guide outlines global actions and specific steps that countries at all income levels can take starting now focusing on six key areas investments incentives information innovation institutions and inclusion Calling for collaboration among governments businesses citizens and international organizations it maps a pathway to making agrifood a significant contributor to addressing climate change and healing the planet
