Trends In Dermatoglyphic Research Studies In Human Biology:

Trends in Dermatoglyphic Research N.M. Durham, C.C. Plato, 2012-12-06 The preparation of a volume of worldwide research contributions can be a time consuming task which is frequently more difficult than many other types of book. This particular venture was made easier by the assistance of many people. Therefore we wish to acknowledge the suggestions, academic support and direction of Dr Kenneth M Weiss, our American editor, the assistance of the staff of the Department of Sociology and Anthropology at the University of Northern Iowa, particularly the generous and congenial efforts of Ms Rosemarie Skaine and Mrs Heidi Anderegg, whose computer and deciphering skills may be legendary, the kind responses to our long distance questions from Mr Martin Scrivener of Kluwer Publications, are much appreciated. Finally the efforts of Dr Paul T Baker and Dr Ralph M Garruto for their help in rounding out the final contents. NMD CCP FOREWORD Among the many techniques developed by nineteenth century anatomists for the study of human morphological structures, the analysis of dermatoglyphics has proven to be one of the most useful and durable. The series of reports presented herein reflect the dynamism of the topic. Such analyses provide a valuable tool for measuring the genetic relatedness of human populations and an inexpensive technique for alerting us to the degree of genetic involvement in the causes of many diseases.

Encyclopedia of Forensic Sciences, 2012-12-28 Forensic science includes all aspects of investigating a crime, including chemistry, biology, and physics, and also incorporates countless other specialties. Today the service offered under the guise of forensic science includes specialties from virtually all aspects of modern science: medicine, engineering, mathematics, and technology. The *Encyclopedia of Forensic Sciences*, Second Edition, Four Volume Set is a reference source that will inform both the crime scene worker and the laboratory worker of each other's protocols, procedures, and limitations. Written by leading scientists in each area, every article is peer reviewed to establish clarity, accuracy, and comprehensiveness. As reflected in the specialties of its Editorial Board, the contents cover the core theories, methods, and techniques employed by forensic scientists and applications of these that are used in forensic analysis. This 4 volume set represents a 30% growth in articles from the first edition, with a particular increase in coverage of DNA and digital forensics. Includes an international collection of contributors. The second edition features a new 21 member editorial board, half of which are internationally based. Includes over 300 articles, approximately 10pp on average. Each article features a suggested readings section which points readers to additional sources for more information, b) a list of related Web sites, c) a 5-10 word glossary and definition paragraph, and d) cross references to related articles in the encyclopedia. Available online via SciVerse ScienceDirect. Please visit www.info.sciencedirect.com for more information. This new edition continues the reputation of the first edition, which was awarded an Honorable Mention in the prestigious Dartmouth Medal competition for 2001. This award honors the creation of reference works of outstanding quality and significance and is sponsored by the RUSA Committee of the American Library Association.

Perspectives in Human Growth, Development and Maturation Parasmani Dasgupta,Roland Hauspie,2013-03-14 One morning in 1969 out of the blue I received a letter which both distressed and astonished me It was from a Prof S R Das in Calcutta who requested me to accept for eventual analysis a mountain of anthropometric data he had accumulated as he was ill and did not expect to survive to analyse it himself The data provided the astonishment twenty two anthropometric characters recorded every six months or a year over a period of 14 years in a mixed longitudinal study of some 560 children aged six months to twenty years Most were in families with siblings also in the study and every child was measured every time by S R Das himself The archive was unique combining the personal anthropometry of R H Whitehouse in the Harpenden Growth Study and the family approach of the Fels Growth Study This was a study of which neither I nor anyone of my acquaintance had heard Even in India Prof Das work was scarcely known It turned out Das was a scholarly man quiet and unassuming absolutely committed to his Sarsuna Barisha Growth Study just the obverse of the professional showman Clearly this was not a request I could refuse although I already had in hand enough projects to occupy Siva himself
