

The background of the cover is a dark, abstract digital graphic. It features numerous glowing circles and rings in various colors, including yellow, orange, blue, and purple. These circles are interconnected by thin, white lines, creating a complex, network-like pattern. Some circles have concentric rings, while others are solid. The overall effect is a sense of dynamic, interconnected digital data or a futuristic cityscape at night.

Digital Play and Technologies in the Early Years Christine Stephen, Liz Brooker, Pamela Oberhuemer, Rod Parker-Rees, 2020-04-24

Technologies are a pervasive feature of contemporary life for adults and children However young children's experiences with digital technologies are often the subject of polarised debate among parents educators policymakers and social commentators particularly since the advent of tablets and smartphones changed access to the Internet and the nature of interactions with digital resources Some are opposed to children's engagement with digital resources concerned that the activities they afford are not developmentally appropriate limit physical activity and restrict the development of social skills Others welcome digital technologies which they see as offering new and enhanced ways of learning and sharing knowledge

Despite this level of popular and policy interest in young children's interactions with digital technologies our understanding of the influence of these technologies on playing and learning and on the role of educators has remained surprisingly limited. The contributions to this book fill in the gaps of our existing understanding of the field. They focus on children and families from Australia to England to Estonia the how and why of encounters with digital technologies the nature of digital play and questions about practice and practitioners. The book raises critical questions and offers new understandings and theoretical insights around one of the hot topics in early years research. This book was originally published as a special issue of the *Early Years* journal.

Papadakis, Michail Kalogiannakis, 2022-04-21 This book brings together a collection of work from around the world in order to consider effective STEM robotics mobile apps education from a range of perspectives. It presents valuable perspectives both practical and theoretical that enrich the current STEM robotics mobile apps education agenda. As such the book makes a substantial contribution to the literature and outlines the key challenges in research policy and practice for STEM education from early childhood through to the first school age education. The audience for the book includes college students teachers of young children college and university faculty and professionals from fields other than education who are unified by their commitment to the care and education of young children.

Digital Childhoods Susan J. Danby, Marilyn Flear, Christina Davidson, Maria Hatzigianni, 2018-04-03 This book highlights the multiple ways that digital technologies are being used in everyday contexts at home and school in communities and across diverse activities from play to web searching to talking to family members who are far away. The book helps readers understand the diverse practices employed as children make connections with digital technologies in their everyday experiences. In addition the book employs a framework that helps readers easily access major themes at a glance and also showcases the diversity of ideas and theorisations that underpin the respective chapters. In this way each chapter stands alone in making a specific contribution and at the same time makes explicit its connections to the broader themes of digital technologies in children's everyday lives. The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their families and reflects the various contexts in which children engage such as preschools and childcare centres.

Young Children Playing and Learning in a Digital Age Christine Stephen, Susan Edwards, 2017-11-27 *Young Children Playing and Learning in a Digital Age* explores the emergence of the digital age and young children's experiences with digital technologies at home and in educational environments. Drawing on theory and research based evidence this book makes an important contribution to understanding the contemporary experiences of young children in the digital age. It argues that a cultural and critically informed perspective allows educators policy makers and parents to make sense of children's digital experiences as they play and learn enabling informed decision making about future early years curriculum and practices at home and in early learning and care settings. An essential read for researchers students policy makers and professionals working with children today this

book draws attention to the evolution of digital developments and the relationship between contemporary technologies play and learning in the early years

Abstracts, 2009 **Growing Up With Technology** Lydia Plowman, Christine Stephen, Joanna McPake, 2010-04-05 *Growing Up with Technology* explores the role of technology in the everyday lives of three and four year old children, presenting the implications for the children's continuing learning and development. Children are growing up in a world where the internet, mobile phones, and other forms of digital interaction are features of daily life. The authors have carefully observed children's experiences at home and analysed the perspectives of parents, practitioners, and the children themselves. This has enabled them to provide a nuanced account of the different ways in which technology can support or inhibit learning. Drawing on evidence from their research, the authors bring a fresh approach to these debates based on establishing relationships with children, families, and educators to get insights into practices, values, and attitudes. A number of key questions are considered, including: Which technologies do young children encounter at home and preschool? What kind of learning takes place in these encounters? How can parents and practitioners support this learning? Are some children disadvantaged when it comes to learning with technology? *Growing Up with Technology* is strongly grounded in a series of research projects providing new ways of thinking about how children's learning with technology can be supported. It will be of great interest to undergraduate and postgraduate students on a range of courses including childhood studies, and those with a particular interest in the use of technology in education. Parents, practitioners, and researchers will also find this a fascinating and informative read.

Young Children in Digital Society, 2025-06 Moving the conversation about young children and digital technologies away beyond good or bad, Edwards and Straker present an innovative perspective to educators, researchers, and communities on how to support young children to learn and thrive safely in a digital society. This book marks a turning point in research concerning young children and technologies. Instead of focussing on the impacts of technology on children in ways that generate conflicting information, advice, and opinions, this book centres on understanding how children live, learn, and play in digital society, and how the adults in their lives can actively create opportunities that support them to participate safely so that they can thrive. Based on a groundbreaking research project in partnership with industry, this text showcases the development of well-designed end-user content and materials such as videos, infographics, and books that best support young children and their adults living, learning, and playing in digital society. It includes practical examples for early childhood
