The Virtual Liturgy and Ritual Artifacts in Medieval and Early Modern Studies Katharine Scherff,2023-03-03

Examining the history of altar decorations this study of the visual liturgy grapples with many of the previous theoretical frameworks to reveal the evolution and function of these ritual objects Using an interdisciplinary approach this book uses traditional art historical methodologies and media technology theory to reexamine ritual objects Previous analysis has not considered the in between nature of these objects as deliberate and virtual conduits to the divine The liturgy the altarpiece the altar environment relics and their reliquaries are media In a series of case studies several objects tell a different story about culture and society in medieval Europe In essence they reveal that media and media technologies generate and modulate the individual and collective structure of feelings of sacredness among assemblages of humans and nonhumans The book will be of interest to scholars working in art history medieval studies early modern studies and architectural history

The Lost Tetrads of Marshall McLuhan Marshall McLuhan,Eric McLuhan,2017-05 Marshall McLuhan was the

visionary theorist best known for coining the phrase the medium is the message His work prefigures and underlies the themes of writers and artists as disparate and essential as Andy Warhol Nam June Paik Neil Postman Seth Godin Barbara Kruger and Douglas Rushkoff among countless others Shortly before his death together with his media scholar son Eric McLuhan worked on a new literary visual code almost a cross between hieroglyphics and poetry that he called the tetrads This was the ultimate theoretical framework for analyzing any new medium a koan like poetics that transcends traditional means of discourse Some of the tetrads were published but only a few Now Eric McLuhan has recovered all the lost tetrads that he and his father developed and accompanies them here with accessible explanations of how they function

Architecture in the Age of Mediatizing Technologies Sang Lee,2024-10-31 This book offers a novel perspective on

contemporary architecture exploring its position in mediatization attained through technological apparatuses It introduces the novel concepts of apparatus centrality and mediatization of architecture which have significant disciplinary and cultural ramifications Highlighting key technological and theoretical developments the book s narrative traces the transformation of architecture from the modernist era to the present digital age En route it reflects on how architecture becomes a crucial element of shifting dispositives through its confluence with technologies of aestheticization and virtualization and by emblemizing ecological ideals It also illuminates the reconfiguring of architectural practice through examining surprising interactions and analogies between architecture and music whose developments in notation and codification continually change the relationship between composer and performer The book explores how architecture is reshaped by broader theory and practice in media and ultimately serves as a cognitive agent It underscores that architecture profoundly influences our phantasmagoric image driven affective world through its increasingly apparatus centric approach to conception design

production and mediatization Architecture in the Age of Mediatizing Technologies brings into focus the behavior of architecture in mediatization for researchers and advanced students in architectural design theory and history As an investigation into the interdisciplinary impact of architecture in a mediatized culture at large it also provides a valuable resource for cultural and media studies

Transforming McLuhan Paul Grosswiler, 2010 Transforming McLuhan explores the radical humanist line of descent in interpreting Canadian media and culture theorist Marshall McLuhan's work rejecting the dominant view of McLuhan as a conservative uncritical herald of technological determinism and capitalism This McLuhan is the oppositional critic of modernity resisting uncontrolled technological change who seeks new media forms with a human face Contributors from diverse international and academic perspectives include Douglas Kellner Nick Stevenson Gary Genosko Richard Cavell Lance Strate Glenn Willmott Patrick Brantlinger Donna Flayhan and Bob Hanke Marshall McLuhan was the first to theorize and to develop a concept of media indicating their importance to all areas of society and culture Today media are far more pervasive than in the 1950s and 1960s when he wrote Yet his work has still not received its due attention Transforming McLuhan will begin to correct this oversight Mark Poster University of California Irvine Author of What's the Matter with the Internet and Information Please Transforming McLuhan re-reads the McLuhan phenomenon in light of today's media saturated 24/7 news and smartphone world Here we meet again with the visionary Tiresias in the Underworld whose dark sayings once lit the late afternoon of the twentieth century These critical readings create a time out to question him again and to open space time interstices for alternate thoughts and alternate actions Michael Heim Mount St Mary's College Los Angeles Author of The Metaphysics of Virtual Reality and Virtual Realism Transforming McLuhan offers a rich and textured reconsideration of Marshall McLuhan's ideas demonstrating how McLuhan's work is a better match for current multi-dimensional and ambivalent understandings of media and culture than it was for the narrower conceptions that guided those who dismissed McLuhan in his own time These provocative and well-written essays persuasively engage in what I have called morphing McLuhan with other key theoretical frameworks As a result Transforming McLuhan illustrates that cultural theorists have much to learn from McLuhanism but that McLuhan's perspective also has much room for enrichment from critical media studies Joshua Meyrowitz University of New Hampshire Author of No Sense of Place The Impact of Media on Social Behavior
