Poetic Inclinations Dorthe Jørgensen, 2020-09-28 Philosophy originates in wonder that generates sensitive thinking, also called aesthetic thinking, an expanded mode of thought that bridges and dissolves contradictions. This book questions the disregard for such thinking in modern society, including the neglect of it in most educational institutions and contemporary research. It describes what it means to think in an aesthetic way when aesthetic is synonymous with sensitive, not sensuous, including how such thinking may foster human well-being and develop our notions of history, hospitality, freedom, and the good life. The formative nature of aesthetic thinking is presented alongside the attestation of its relevance in many disciplines and a broad spectrum of society, in border studies, education, policy, and social work, and in life in general. Poetic Inclinations: Ethics, History, Philosophy is related to the simultaneously published monograph Imaginative Moods: Aesthetics, Religion, Philosophy. Together, they constitute a comprehensive presentation in English of the author's philosophy of experience, which includes new ways of conceiving of and applying aesthetics, hermeneutics, and phenomenology, and of integrating these disciplines as well as theology *Current Contents. **German Studies in North America** Keith Duane Alexander, Annemarie Sammartino, 2004 **Subject Guide to Books in Print**, 1991 The Publishers Weekly, 1999 *Getty Research Journal*, 2009 **Freedom of Thought and Societal Forces** Rudolf Steiner, 2008 6 lectures in Ulm, Berlin, and Stuttgart May 26–December 30, 1919 CW 333 Freedom of Thought and Societal Forces offers a broad overview of Steiner's fresh thinking on what he called the threefold social order. He acknowledged that the demand for social change derives above all from the working class, whom industrialization had forced into a kind of indentured life dominated by economics. From Steiner's perspective, the underlying issue is not just economic, however, but also spiritual or cultural: culture, and the cultured classes, have become estranged from real life. Society needed a free culture that includes all classes. It also needs to shift labor into the legal sphere of rights, the only place where workers can find real freedom in society. Capital, too, needs to be liberated from egotism and allowed, like goods, to circulate freely. Above all, Steiner understood that social realities cannot be separated from the spiritual realities of human existence. From this perspective, we lack knowledge of ourselves as spiritual beings, and thinking has become abstract. To remedy this, we must first acknowledge it and then develop modesty and humility. Next, we must increase our capacity to love one another and the world. Approaching this reality from another side, we see that what ordinary individual thinking afflicts, culture in general,

which becomes removed from reality Culture like thinking must become alive and universally human This is impossible however unless we develop what Steiner calls freedom of thought Authentic freedom of thought is always ethical and overcomes egotism Indeed a more general exercise of freedom in thought as Steiner conceives it provides a way through the twin dangers of materialism and abstraction that is through ahrimanic and luciferic worldviews which together threaten society in both the narrow sense through nationalism and globally through geopolitics
