partners in the region Secondly it delineates how they have confronted China s inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei s 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People s Republic of China have been driven by a naive and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing s growing assertiveness after 2009 caused the three major European powers to awaken to China s rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments The Commercial & Financial Chronicle ,1897 **Nursery Retailer** ,1998 Annual Report of the Social Security Administration Submitted to the Congress by the Department of Health, Education, and Welfare United States.
