of art history that bridges the divide between fine art and material culture through an examination of objects and their uses
Art history is often viewed through cultural or national lenses that define some works as fine art while relegating others to
the category of craft Global Objects points the way to an interconnected history of art examining a broad array of functional
aesthetic objects that transcend geographic and temporal boundaries and challenging preconceived ideas about what is and
is not art Avoiding traditional binaries such as East versus West and fine art versus decorative art Edward Cooke looks at the
production consumption and circulation of objects made from clay fiber wood and nonferrous base metals Carefully
considering the materials and process of making and connecting process to product and people he demonstrates how objects
act on those who look at use and acquire them He reveals how objects retain aspects of their local fabrication while
absorbing additional meanings in subtle and unexpected ways as they move through space and time In emphasizing multiple
centers of art production amid constantly changing contexts Cooke moves beyond regional histories driven by geography
nation state time period or medium Beautifully illustrated Global Objects traces the social lives of objects from creation to
purchase and from use to experienced meaning charting exciting new directions in art history **AB Bookman's Weekly**
