Villes Portuaires Maritimes France XIXe Xxie:

Les villes portuaires maritimes en France Bruno Marnot, 2015-09-02 Les villes portuaires françaises ont connu de profonds bouleversements entre 1789 et le début du XIXe siècle. La première rupture intervient après les longues guerres de la Révolution et de l'Empire qui ruinent la prospérité des ports. Pourtant un nouveau contexte économique et maritime international émerge au milieu du XIXe siècle qui signe l'entrée des villes portuaires dans l'ère contemporaine. Les métamorphoses multiformes des ports ont marqué en profondeur les sociétés et les territoires urbains, distorsions morphologiques, transformations du travail portuaire, présence accrue de l'industrie lourde, développement du cosmopolitisme et affirmation du caractère populaire des quartiers portuaires. Les destructions de la Deuxième Guerre mondiale et une séquence inédite de mutations du transport maritime, à partir des années 1950, donnent aux villes portuaires un caractère à la fois industriel et fonctionnaliste qui trouve ses limites avec la crise des années 1970-1980. La globalisation de la fin du XXe siècle ouvre une nouvelle ère pour les villes portuaires françaises, aussi riche d'opportunités que de défis majeurs relever. *Spies in European Culture, 1815-1914* Laura Di Fiore, Elisabetta Abignente, 2025-01-23 This volume brings together academics from the USA and across Europe to examine the nature representations and perceptions of the figure of the spy in Europe between 1815 and 1914. As such it is the first scholarly investigation of the genesis both of contemporary espionage and of the cultural imagination associated with it. *Spies in European Culture 1815-1914* sheds light on the founding moment of espionage and the use of secrecy in politics in the contemporary age. It successfully argues that the 19th century saw the development of a cultural historical process in which disruptive novelties like the disguise, the secret and the double identity simultaneously assailed the spheres of the state, the self and the imaginary, ushering in distinctive features of society in the modern era in the process. This global phenomenon in which state and society but also reality and fiction were profoundly intertwined is therefore investigated by means of a transdisciplinary analysis that considers both the politico-institutional and the cultural planes that existed at the time. *Fuelling the World Economy* Daniel Castillo Hidalgo, Cezar Honorato, 2023-07-07 This book explores the functioning of coal markets and their influence on ports and maritime economics since the second half of the nineteenth century. Each chapter includes case studies from different parts of the world explaining the role played by coal in the expansion of the shipping industry. This book also explores regions usually neglected by the mainstream scholarly literature in this field. The relationship between steam engine technology and imperial expansion, how the emergence of global security was driven by maritime technological revolutions and the connection between global seaports and the spread of global economic and political systems are also discussed. This book aims to highlight the important role seaports and fuel markets played in the evolution of international commercial flows and activities. *Fuelling the World Economy* will be useful for historians, economists and geographers interested in maritime and energy issues as well as researchers interested in transport and technology. *Les littoraux français* Michel Desse, Céline Chadenas, Vincent Herbert, Samuel

Robert, 2024-06-26 R dig par un collectif d'une vingtaine d'enseignants cet ouvrage conforme au programme de la question permettra aux candidats d'avoir une vision globale de la question travers ces cinq axes D finir les littoraux avec une chelle r gionale La littoralisation progressive des politiques publiques d'un tat terrien Le littoral un espace habit Des territoires littoraux historiquement diversifi s Quels littoraux pour demain **La Résilience des villes portuaires européennes**

depuis la fin des grandes expéditions qui au début du xve siècle avaient conduit les flottes chinoises sur les côtes de l'Afrique. Une étude fondamentale dans la tradition des grands travaux de Fernand Braudel. François Gipouloux, directeur de recherche au CNRS, enseigne à l'EHESS. Spécialiste de l'économie chinoise, il bénéficie d'une expérience de terrain de plus de quinze ans en Asie (Chine, Japon, Hong Kong). *Terres marines* Frédéric Chauvaud, Jacques Péret, 2005. Livre d'hommage. *Terres Marines* rassemble les textes de collègues de spécialistes d'ici et d'amis de Dominique Guillemet, universitaire dans toute la plénitude du mot, décédé brutalement en mars 2005, qui enseignait l'histoire moderne à l'université de Poitiers. Spécialiste reconnu de la géographie historique du littoral et des sociétés francophones d'Amérique du Nord, son dernier livre, *Champlain ou les portes du Nouveau Monde* 2004, écrit en collaboration avec Mickaël Augeron, fait autorité. Les études réunies ici montrent tout le dynamisme d'une histoire impulsée par Dominique Guillemet. Les quarante contributions rassemblées dans le présent volume traitent aussi bien de la perception des zones côtières du régime seigneurial au Canada, des territoires du soldat des Bohémiens, des naufrages que des lieux du crime. Elles reviennent sur les notions de pays, de paysages maritimes, de commémorations, de lieux de mémoire, de terres liquides. Elles mènent du Poitou à Grèce, de la Basse Bretagne aux mers du Sud. Regroupées en trois grands ensembles : histoire et représentations du littoral, paysages et territoires, voyages, mobilité et nouveaux mondes, elles témoignent de la vitalité d'une histoire de terrain de l'époque médiévale à nos jours. Les mots de l'Union européenne Jean-Marc Février, Fabien Terpan, **Costumes niçois** Dominique Veux-Rocca, 2007.
