Globalization, the State, and Violence Jonathan Friedman, 2004-09-08 Friedman and a distinguished group of contributors offer a compelling analysis of globalization and the lethal explosiveness that characterizes the current world order In particular they investigate global processes and political forces that determine networks of crime commerce and terror and reveal the economic social and cultural fragmentation of transnational networks In a critical introduction Friedman evaluates how transnational capital represents a truly global force but geographical decentralization of accumulation still leads to declining state hegemony in some areas and increasing hegemony in others The authors examine the growth and increasing autonomy of indigenous populations and the massively destabilizing effect of migration processes They describe the rapid increase in criminalization of ethnic and immigrant groups as well as an increase in class stratification creating new forms of

social confrontation and violence In addition to ethnic identity based conflict there are analyses of transnational criminal networks which also represents disintegration of larger homogeneous territories or hierarchical orders The authors ask us to reevaluate the dynamics of globalization the contradictions of centralization and fragmentation around the world as we discover how best to transform these conditions for the future This research was originally funded by the Harry Frank Guggenheim Foundation Globalization the State and Violence will be a valuable reference in anthropology social theory international politics and economics ethnic conflict immigration and economic history

The Global Society and Its Enemies Ludger Kühnhardt, 2018-05-09 This book discusses contemporary constellations of international politics and global transformation It offers guidance on how to conceptualize the complexity of current global changes and practical policy advice in order to promote an open global society In the light of today's challenges the author reinterprets the main argument of the philosopher Karl Popper in *The Open Society and Its Enemies* Based on this framework and new empirical evidence the book discusses the thesis of an ongoing Third World War triggered by fundamental deficits in nation building occurring primarily within states and not between them and accelerated by asymmetric forms of warfare and Islamist totalitarianism The book also explores various threats to the global order such as the paradox of borders as barriers and bridges the global effects of the youth bubble in many developing countries and the misuse of religious interpretation for the use of political violence Lastly the author identifies advocates and supporters of a liberal multilateral and open order and argues for a reinvention of the Western world to contribute to a revival of a liberal global order based on mutual respect and joint leadership
