Introduction

Figure 15.1 illustrates an alternative approach to development:

1. Scientific Management: How well-structured?
2. Strategic Humanistic: Who is involved?
3. Management Science: Systems
4. Scientific Management
5. Management Science: Organizational Development

Overview

It is possible to develop only a single, general management strategy and still be successful in developing a global team. This is because the team is not a single entity, but a collection of individuals, each with their own strengths and weaknesses, and their own unique perspective on the world.

There are two main ways to develop a global team: one is to develop a single, general management strategy and the other is to develop a team that is composed of individuals from different cultures and backgrounds. The first approach is more likely to be successful in the long run, but it is also more difficult to implement.

Global Management involves understanding the unique strengths and weaknesses of each individual in the team, and then developing a strategy that takes into account these differences. This approach is more likely to be successful in the long run, but it is also more difficult to implement.

Individuals and teams are not the same. Individuals are not the same as teams, and teams are not the same as individuals.
