Visionary Architecture From Babylon To Virtual Reality Architecture And Design:

Architecture and Science-Fiction Film David T. Fortin, 2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible *NATØ: Narrative Architecture in Postmodern*

London Claire Jamieson, 2017-01-20 Chronicling the last radical architectural group of the twentieth century NAT Narrative Architecture Today who emerged from the Architectural Association at the start of the 1980s this book explores the group's work which echoed a wider artistic and literary culture that drew on the specific political social and physical condition of 1980s London It traces NAT's identification with a particular stream of post punk postmodern expression a celebration of the abject an aesthetic of entropy and a do it yourself provisionality NAT has most often been documented in reference to Nigel Coates the instigator of NAT which has led to a one sided one dimensional record of NAT's place in architectural history This book sets out a more detailed contextual history of NAT told through photographs drawings and ephemera restoring a truer polyvocal narrative of the group's ethos and development **Italo Calvino's Architecture of Lightness** Letizia

Modena, 2011-05-09 This study recovers Italo Calvino's central place in a lost history of interdisciplinary thought politics and literary philosophy in the 1960s Drawing on his letters essays critical reviews and fiction as well as a wide range of works primarily urban planning and design theory and history circulating among his primary interlocutors this book takes as its point of departure a sweeping reinterpretation of *Invisible Cities* Passages from Calvino's most famous novel routinely appear as aphorisms in calendars posters and the popular literature of inspiration and self help reducing the novel to vague abstractions and totalizing wisdom about thinking outside the box The shadow of postmodern studies has had a similarly diminishing effect on this text rendering up an accomplished but ultimately apolitical novelistic experimentation in endless deconstructive deferrals the shiny surfaces of play and the ultimately rigged game of self referentiality In contrast this study draws on an archive of untranslated Italian and French language materials on urban planning architecture and utopian architecture to argue that Calvino's novel in fact introduces readers to the material history of urban renewal in Italy France and the U S in the 1960s as well as the multidisciplinary core of cultural life in that decade the complex and continuous interplay among novelists and architects scientists and artists literary historians and visual studies scholars His last love

poem for the dying city was in fact profoundly engaged deeply committed to the ethical dimensions of both architecture and lived experience in the spaces of modernity as well as the resistant practices of reading and utopian imagining that his urban studies in turn inspired

Fabricating Architecture Robert Corser, 2012-03-20 In this increasingly digitized world any investigation of architecture inevitably leads to considerations of fabrication But despite its omnipresence in contemporary practice and theory digital design remains a fluid concept its development and current influence discussed in scattered articles

Visionary Architecture Christian Werner Thomsen, 1994 In short it is a book about those who have endeavored to preserve creativity in their profession and whose innovative ideas have led in practical terms to the development of new architectural concepts new ways of living and working and new aesthetic forms

The Practice of Modernism John R. Gold, 2007-06-13 Making extensive use of information gained from hours of in depth interviews with architects this new book examines the complex relationship between vision and subsequent practice in the saga of post war urban reconstruction

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Brecht Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrication ratio with a productive return to l'art de bien bâtir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

The Phenomenon of Diagonality Joel Levinson, 2025-10-13 Throughout history the force of gravity rendered the right angle sacrosanct in the world of architecture However as the 20th century dawned the long simmering diagonal motif finally arrived full force and upended the fields of architecture design and the fine arts This book summarizes the author's 60 year study of this revolutionary geometric motif and highlights how it is tied to social upheavals and artistic movements Once

people understand the concept of Diagonality they will begin to see its angled planes on street corners in art museums and possibly in everyday objects Diagonality has been all around us but hidden in plain sight *Shapers of Urban Form* Peter J. Larkham, Michael P. Conzen, 2014-06-27 People have designed cities long before there were urban designers In *Shapers of Urban Form* Peter Larkham and Michael Conzen have commissioned new scholarship on the forces people and institutions that have shaped cities from the Middle Ages to the present day Larkham and Conzen collect new essays in urban morphology the people centered predecessor to contemporary theories of top down urban design *Shapers of Urban Form* focuses on the social processes that create patterns of urban forms in four discrete periods Pre modern early modern industrial era and postmodern development Featuring studies of English American Western and Eastern European and New Zealand urban history and urban form this collection is invaluable to scholars of urban design and town planning as well as urban and economic historians *Proceedings of the Seventh International Conference on Computing in Civil and Building Engineering* Chang-Koon Choi, Chung-Bang Yun, Hyo-Gyoung Kwak, 1997 *Impossible Heights* Adnan Morshed, 2015-01-15 The advent of the airplane and skyscraper in 1920s and 30s America offered the population an entirely new way to look at the world from above The captivating image of an airplane flying over the rising metropolis led many Americans to believe a new civilization had dawned In *Impossible Heights* Adnan Morshed examines the aesthetics that emerged from this valorization of heights and their impact on the built environment The lofty vantage point from the sky ushered in a modernist impulse to cleanse crowded twentieth century cities in anticipation of an ideal world of tomorrow Inspired by great new heights American architects became central to this endeavor and were regarded as heroic aviators Combining close readings of a broad range of archival sources Morshed offers new interpretations of works such as Hugh Ferriss's *Metropolis* drawings Buckminster Fuller's *Dymaxion* houses and Norman Bel Geddes's *Futurama* exhibit at the 1939 New York World's Fair Transformed by the populist imagination into master builders these designers helped produce a new form of visuality the aesthetics of ascension By demonstrating how aerial movement and height intersect with popular superman discourses of the time Morshed reveals the relationship between architecture art science and interwar pop culture Featuring a marvelous array of never before published illustrations this richly textured study of utopian imaginings illustrates America's propulsion into a new cultural consciousness **Mobile** Jennifer Siegal, 2002 This text explores the ever growing range of possibilities of portable demountable and mobile structures The volume includes work by Office of Mobile Design LOT EK and Mark Fisher Using colour images text and detailed drawings the contributors reveal their working methods *Planning in a Global Era* Andy Thornley, 2017-03-02 Globalization was the buzzword of the last decade Advances in communication technology computing and air travel have all contributed to the establishment of what has been referred to as a network society that encompasses the globe Such arguments clearly have a significance on planning an activity which has been concerned with controlling and shaping the use of space This volume brings together contributions from across the world in

order to address some of the questions that arise from such global changes The opening section addresses the globalization debate directly raising some theoretical issues and exploring the planning implications across a range of world cities This is followed by an exploration of the way the theoretical debate about planning may need to advance to encompass contemporary forces A number of more specific accounts addressing the need for adaptation are offered The final section focuses on two aspects housing and sustainability which persist as wicked problems and are likely to remain at the top of the agenda in the third millennium
