The Politics and Power of Tourism in Palestine Rami K. Isaac, C. Michael Hall, Freya Higgins-Desbiolles, 2015-12-14 Tourism in Palestine has been receiving an increasingly important profile given its economic and religious importance and the significant role it plays in Israeli Palestinian relations representation of Palestinian statehood and identity and wider Middle Eastern politics Nevertheless Palestine like much of the Middle East as a whole remains extremely underrepresented in tourism literature This title aims to fill this void by being the first book dedicated to exploring the significance of tourism in relationship to Palestine The book examines the role of tourism in Palestine at three main levels First it provides an overview of destination management and marketing issues for the tourism industry in Palestine and addresses not only the visitor markets and the economic significance of tourism but also the realities of the difficulties of destination management marketing and promotion of the Palestinian state Second it provides a series chapters and case studies that interrogate not only the various forms of tourism in Palestine but also its economic social environmental and spiritual importance This section also conveys a dimension to tourism in Palestine that is not usually appreciated in the Western mainstream media The third section indicates the way in which tourism in Palestine highlights broader questions and debates in tourism studies and the way in which travel in the region is framed in wider discourses A significant dimension of the book is the attention it gives to the different voices of stakeholders in Palestinian tourism at varying levels of scale This timely volume will offer the reader significant insight into the challenges and issues of tourism in

this area now and in the future It will benefit those interested in tourism Middle East studies politics economics development studies and geography *Landscape Planning with Ecosystem Services* Christina von Haaren, Andrew A. Lovett, Christian Albert, 2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape challenges of 21st century Europe *Recent Advances and Prospects in Urban E-Planning* Nunes Silva, Carlos, 2024-12-31 The increasing integration of digital technologies in urban planning offers transformative opportunities for improving governance citizen engagement and operational efficiency However it also presents significant challenges including ethical concerns data bias and potential inequalities in access and outcomes Understanding these dynamics is crucial as governments and planners strive to balance innovation with inclusivity and accountability Ultimately it highlights the critical role of urban e planning in addressing the complexities of modern cities while fostering equitable and sustainable development *Recent Advances and Prospects in Urban E Planning* comprises empirical findings and insights on the ongoing transformation of the field of urban planning due to the extensive use of information and communication technologies in the planning process its recent advancements and the prospects for the next years By examining global case studies and reflecting on technological advancements this book underscores the importance of equipping urban planning processes with tools that enhance transparency effectiveness and responsiveness to societal needs Covering topics such as 3D models healthcare access and waste governance this book is an excellent resource for urban planners policymakers academicians researchers technology developers data scientists postgraduate students and more **Visualizing Climate Change** Stephen R.J.
