exchange programs Although there have been increased efforts and scholarship in support of diversity and multicultural awareness these efforts have largely focused on the US We acknowledge that many leadership theories are domestic in that they typically incorporate US perspectives or a single culture description of effective leadership This book provides a deeper understanding of diverse and multicultural perspectives as they relate to a world that is becoming increasingly interconnected economically socially and culturally Particular attention is paid to providing specific strategies for social justice leaders working in PK 12 and or higher education and leadership preparation programs to promote effective leadership that reflects multicultural understanding of the diversity both within and outside the US Within the context of leadership practice internationalization offers new insights and ideas about leadership aims processes and competencies as a means for addressing equity concerns throughout PK 20 education *Gender and Educational Leadership in Greece* Emmy Papanastasiou, 2024-06-27 Worldwide women constitute the majority of the teaching force but men are more likely to achieve headship Internationally a number of scholars working within sociology and the sociology of education have focused on the continued influence of gender on the shaping of identity and choices in relation to leadership work and home But in Greece the under representation of women in educational leadership has received limited attention Why are there so few women in educational leadership How are leadership and gender constructed by men and women head teachers and teachers Are the perceptions of men and women different and gendered What is the future for women in leadership in Greece Emmy Papanastasiou uses qualitative data from interviews with men and women head teachers and teachers in Greece and analyzes them using a feminist social constructionist framework to provide some answers to these key questions In doing so the book sheds light on social cultural and political factors that influence women s potential advancement in educational leadership

educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education

Globalised re/gendering of the academy and leadership Jill Blackmore, Marita Sánchez-Moreno, Naarah

Sawers, 2016-10-18 The significance of Higher Education to national knowledge based economies has made the sector the object of government policies international monitoring and corporatization This radical global restructuring of higher education is gendered in its processes practices and effects Exploring how the re organisation of the sector has redefined academic management and professional roles and identities this book considers the different impacts of structural change for men and women working at diverse levels of the academy Drawing from empirical studies undertaken in Europe North America Asia and Australasia the contributions offer a range of theoretical and methodological perspectives including large scale comparative data and case studies They inform what is a key policy issue in the 21st century the re positioning of women in the academy and leadership Despite a range of institutional equity strategies in which women learnt the rules of the game this book shows that structural and cultural barriers often conceptualised through metaphors such as sticky floors glass ceilings chilly climates or dead end pipelines have not disappeared as might be expected as the academy becomes numerically feminized Each chapter provides an insight into how historical legacies cultural contexts geographic locations modes of regional and institutional governance and national policies are mediated and vernacularized through practice by localized gender regimes and orders This book was originally published as a special issue of Gender and Education **A**

World of Their Own Meghan Healy-Clancy, 2014-06-19 The politics of black education has long been a key issue in southern African studies but despite rich debates on the racial and class dimensions of schooling historians have neglected their distinctive gendered dynamics A World of Their Own is the first book to explore the meanings of black women s education in the making of modern South Africa Its lens is a social history of the first high school for black South African women Inanda Seminary from its 1869 founding outside of Durban through the recent past Employing diverse archival and oral historical sources Meghan Healy Clancy reveals how educated black South African women developed a tradition of social leadership by both working within and pushing at the boundaries of state power She demonstrates that although colonial and apartheid

governance marginalized women politically it also valorized the social contributions of small cohorts of educated black women This made space for growing numbers of black women to pursue careers as teachers and health workers over the course of the twentieth century After the student uprisings of 1976 as young black men increasingly rejected formal education for exile and street politics young black women increasingly stayed in school and cultivated an alternative form of student politics Inanda Seminary students experiences vividly show how their academic achievements challenged the narrow conceptions of black women s social roles harbored by both officials and black male activists By the transition to democracy in the early 1990s black women outnumbered black men at every level of education introducing both new opportunities for women and gendered conflicts that remain acute today

Bridging Educational Leadership, Curriculum Theory and Didaktik Michael Uljens, Rose M. Ylimaki, 2017-10-04 This book is open access under a CC BY 4.0 license This volume argues for the need of a common ground that bridges leadership studies curriculum theory and Didaktik It proposes a non affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields It concludes with implications of its coherent theoretical framing for future empirical research Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education These challenges affect governance leadership and curriculum involving changes in aims and values that demand coherence Yet the traditionally disparate fields of educational leadership curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time An additional aspect is that modern education theory was developed in relation to nation state education which in the meantime has become more complicated due to issues of globopolitanism This volume examines the current state of affairs and addresses the issues involved In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re theorize these traditions with non affirmative education theory moving beyond social reproduction and social transformation perspectives
