Women In Engineering Pioneers And Trailblazers:

Women in Engineering Margaret E. Layne, 2009-06-05 *Women in Engineering Pioneers and Trailblazers* introduces the visionary women who opened the door for today's female engineers. Pioneers such as Emily Roebling, Kate Gleason, Edith Clarke, and Katherine Stinson come to life in this anthology of essays, articles, lectures, and reports. In this book, the significant contributions women have made to engineering in areas as diverse as construction, management, environmental protection, and industrial efficiency are finally placed in their proper historical context. Studies on women engineers in the 1920s and in the years following World War II underscore how far women have progressed in engineering and how far they have to go. With selections that span a century of historical and social analysis, *Women in Engineering Pioneers and Trailblazers* and its companion volume *Women in Engineering Professional Life* present a range of perspectives on women in engineering that will be of interest to historians, engineers, educators, and students. About the Author: Margaret E. Layne, P.E., is project director of Advance VT, a program created at Virginia Tech to increase the participation and advancement of women in academic science and engineering careers.

Women in Engineering, 2010 *Women in Engineering* Margaret E. Layne, 2009 Margaret Layne illuminates the professional lives of today's women engineers through articles, lectures, reports, and essays dating back to the 1920s.

Rare Invaders#The Pre-World War II History of Women in American Engineering, digital original edition Amy Sue Bix, 2015-08-03 Engineering education in the United States was long regarded as masculine territory. In this BIT, Amy Bix describes how a few women breached the gender-reinforced boundaries of engineering education before World War II. They were a rare group of women who simply worked their way into engineering through observation, persistence, and the happenstance of being in the right place at the right time.

Texas Women Elizabeth Hayes Turner, Stephanie Cole, Rebecca Sharpless, 2015 This is a collection of biographies and composite essays of Texas women contextualized over the course of history to include subjects that reflect the enormous racial, class, and religious diversity of the state. Offering insights into the complex ways that Texas' position on the margins of the United States has shaped a particular kind of gendered experience, the volume also demonstrates how the larger questions in United States women's history are answered or reconceived in the state. Beginning with Juliana Barr's essay, which asserts that women marked the lines of dominion among Spanish and Indian nations in Texas and explodes the myth of Spanish domination in colonial Texas, the essays examine the ways that women were able to use their borderland status to stretch the boundaries of their own lives. Eric Walther demonstrates that the constant changing of governments in Texas—Spanish, Mexican, Texan, and U.S.—gave slaves the opportunities to resist their oppression because of the differences in the laws of slavery under Spanish or English or American law. Gabriela Gonzalez examines the activism of Jovita Idar on behalf of civil rights for Mexicans and Mexican Americans on both sides of the border. Renee Laegreid argues that female rodeo contestants employed a unique regional interplay of masculine and feminine behaviors to shape their identities as cowgirls. *The*

Brilliant Calculator Jan Lower, 2023-03-14 A Mathical Honor Book Hidden Figures meets Rosie Revere Engineer in this STEM STEAM picture book about Edith Clarke the innovator who solved an electrical mystery and built the first graphing calculator from paper Long before calculators were invented little Edith Clarke devoured numbers conquered calculations cracked puzzles and breezed through brainteasers Edith wanted to be an engineer to use the numbers she saw all around her to help build America When she grew up no one would hire a woman engineer But that didn't stop Edith from following her passion and putting her lightning quick mind to the problem of electricity But the calculations took so long Always curious Edith couldn't help thinking of better ways to do things She constructed a calculator from paper that was ten times faster than doing all that math by hand Her invention won her a job making her the first woman electrical engineer in America And because Edith shared her knowledge with others her calculator helped electrify America bringing telephones and light across the nation

Fair Shared Cities Marion Roberts, 2016-04-15 Bringing together a diverse team of leading scholars and professionals this book offers a variety of insights into ongoing gender mainstreaming policies in Europe with a focus on urban spatial planning Gender mainstreaming was first legislated for in the European Union with the Treaty of Amsterdam in 1999 and although many interesting developments have occurred throughout the decade that followed there is still much to do in terms of policy knowledge production dissemination and education This work contributes to all three objectives by advancing the state of knowledge as well as providing educational and professional tools in the field of gender sensitive planning in Europe The volume begins by explaining the concept of gender mainstreaming in relation to its origins in the second wave of the women's movement and critiques of planning architecture transport planning and other built environment disciplines It then provides a brief history of how gender mainstreaming was incorporated into European law before focussing on the theoretical issues and questions that surround the concept of gender mainstreaming as they relate to urban space and the planning of cities and regions including a discussion of the persistence of inequalities between the sexes in their access to urban space and services In particular the division between waged and unwaged work and its impact on the social construction of gender and of the physical built environment is considered The differences between definitions of feminism and their implications for action in planning and design are also explored paying regard to the tensions between a feminist vision of a transformation of gender relations and the requirements of gender mainstreaming to accommodate the different needs of women and men in their everyday lives in urban space Throughout the book key issues recur such as the importance of time and space in the experience of urbanism resistances to change on the part of institutions and social structures and the importance of networks Education and training also appear as common themes as do citizen participation and the structures of governance The chapters are organised into four sections concepts structures empowerment and spatial quality Contributors demonstrate a variety of approaches to the intersections of gender women cities and planning dealing with substantive and procedural issues in planning at both local and regional scales They stress the links between

environmental sustainability and gender sensitive urban development The book concludes by putting forward an outlook for future action *Feminist Collections* ,2010 **New Books on Women, Gender and Feminism** ,2010 **New Books on Women and Feminism** ,2010 **SWE** ,2008 A Hand Up Deborah C.
