Wood And Wood Joints Building Traditions Of Europe And Japan:

Wood and Wood Joints Klaus Zwirger,2015 Building with wood as an ecologically viable material is a tradition with a long history In the most typical method elements are connected by using wood joints which do not require the assistance of adhesives or metal connectors By looking at several hundred examples from Japan China and 18 European countries this book describes in great detail the history of timber architecture in terms of its technical aesthetic and ecological dimensions This thorough study is a mine of information to specialists in this field it opens up to the craftsman of today what has become an almost forgotten world and provides a fascinating account for the general reader The new introduction to the third edition reviews developments since the first publication of this book in 1997 Wood and Wood Joints Klaus Zwirger,1997 In the

most typical method of building with wood elements are connected by using wood joints which do not require the assistance of adhesives or metal connectors This art of wood jointing reached its zenith in Japan but Europe too provided its share of highly influential forms By looking at several hundred examples from Japan and 18 European countries this book describes in great detail the history of timber architecture in terms of its technical aesthetic and ecological dimensions The beauty of timber structures and their detailing is captured in superb black and white photographs Exciting three dimensional drawings reveal the secret life concealed within the joints This thorough study will prove a mine of information to specialists in this field it will open up to the craftsman of today what has become an almost forgotten world and provide a fascinating account for the general reader **Building from Tradition** Elizabeth M. Golden,2017-12-22 Building from Tradition examines the

recent resurgence of interest in the handmade building and the use of local and renewable materials in contemporary construction In the past raw materials were shaped to provide shelter and to accommodate the cultural social and economic needs of individuals and communities This is still true today as architects engineers and builders turn once again to local resources and methods not simply for constructing buildings but also as a strategy for supporting social engagement sustainable development and cultural continuity Building from Tradition features global case studies that allow readers to understand how building practices developed and refined by previous generations continue to be adapted to suit a broad range of cultural and environmental contexts The book provides a survey of historical and technical information about geologic and plant based materials such as stone earth reed and grass wood and bamboo 24 detailed case studies examining the disadvantages and benefits to using traditional materials and methods and how they are currently being integrated with contemporary construction practices **Wonderpedia of NeoPopRealism Journal, Today's Featured Articles,**
