Wooden Deck Design Guide For Nyc:

Structural Design James R. Underwood, Michele Chiuini, 1998 Structural Design presents the conceptual and practical underpinnings of basic building design and technology in a single comprehensive source. It provides essential coverage of the integral relationships of structural architectural form and spatial organization and an understanding of the impact of load configurations and other key determinants of design. Essential principles as well as structural solutions are visually reinforced with hundreds of architectural drawings, photographs and other illustrations making this book truly architect friendly. Ideal for use as a general and technical reference in the design studio as a study aid for the architectural registration exam or as an office resource. Structural Design is a superb companion for the architecture student and practicing professional. It includes in depth coverage of steel, wood, reinforced concrete and masonry including lateral force generation and design. Over 1 000 illustrations and photographs. Real world examples, sample problems and useful references throughout. Conventional and SI unit systems.

Landscape Architectural Graphic Standards Leonard J. Hopper, 2007-09-28 The new student edition of the definitive reference on landscape architecture. Landscape Architectural Graphic Standards Student Edition is a condensed treatment of the authoritative Landscape Architectural Graphic Standards Professional Edition. Designed to give students the critical information they require, this is an essential reference for anyone studying landscape architecture and design. Formatted to meet the serious student's needs, the content in this Student Edition reflects topics covered in accredited landscape architectural programs, making it an excellent choice for a required text in landscape architecture, landscape design, horticulture, architecture and planning, and urban design programs. Students will gain an understanding of all the critical material they need for the core classes required by all curriculums, including Construction, documentation, Site planning, Professional practice, Site grading and earthwork, Construction principles, Water supply and management, Pavement and structures in the landscape, Parks and recreational spaces, Soils, asphalt, concrete, masonry, metals, wood and recreational surfaces. Evaluating the environmental and human health impacts of materials. Like Landscape Architectural Graphic Standards, this Student Edition provides essential specification and detailing information on the fundamentals of landscape architecture, including sustainable design principles, planting, including green roofs, stormwater management and wetlands, construction and evaluation. In addition, expert advice guides readers through important considerations such as material life cycle analysis, environmental impacts, site security, hazard control, environmental restoration and remediation, and accessibility.
