Water Lore Camille Roulière, Claudia Egerer, 2022-05-19 Located within the field of environmental humanities this volume engages with one of the most pressing contemporary environmental challenges of our time how can we shift our understanding and realign what water means to us Water is increasingly at the centre of scientific and public debates about climate change In these debates rising sea levels compete against desertification hurricanes and floods follow periods of prolonged drought As we continue to pollute canalise and desalinate waters the ambiguous nature of our relationship with these entities becomes visible From the paradisiac and pristine scenery of holiday postcards through to the devastated landscapes of post tsunami news reports images of waters surround us And while we continue to damage what most sustains us collective precarity grows Breaking down disciplinary boundaries with contributions from scholars in the visual arts history earth systems anthropology architecture literature and creative writing archaeology and music this edited collection creates space for less prominent perspectives with many authors coming from female Indigenous and LGBTQIA contexts Combining established and emerging voices and practice led research and critical scholarship the book explores water across its scientific symbolic material imaginary practical and aesthetic dimensions It examines and interrogates our cultural construction and representation of water and through original research and theory suggests ways in which we can reframe the dialogue to create a better relationship with water sources in diverse contexts and geographies This expansive book brings together key emerging scholarship on water persona and agency and would be an ideal supplementary text for discussions on the blue humanities climate change environmental anthropology and environmental history

Housing the Environmental Imagination Peter Quigley, 2011-10-18 The last few decades have seen an explosion of interest in literature and the sense of place Many essays books and presentations have explored the aesthetics politics and urgency of understanding and appreciating the unique qualities of coasts mountains deserts bioregions and more Little attention however has been given to the process of establishing residence in these special places and what it means to make a life there *Housing the Environmental Imagination* focuses directly on this omission by examining the writing houses and lives of Thoreau Robinson Jeffers Gary Snyder Wendell Berry Scott Russell Sanders Arne Naess Mary Austin Jack London and many others In addition to addressing the lack of study on this theme of living in place Quigley adds a crucial additional element living and writing in place The unique aspect of this study is the selection of those writers whose writing project is inseparable from the living project In other words without the cabin at the pond there would be no *Walden* The same can be said of Snyder's *Kitkitdizze* and Jeffers' *Tor House* and *Hawk Tower* Therefore it's Quigley's

intention to throw open the issue of the meaning of houses and to explore the role houses play in the lives of some of the more well known nature writers Thoreau is cited by Quigley as a good point of departure for examining the meaning and role of houses Most men appear never to have considered what a house is In this way Quigley claims to have identified a new genre of writing and in the process pushes back against postmodern approaches This writing connected inseparably to house and region depends on and is anchored in experience and to a world of natural processes and values An interesting aspect of the book is the way Quigley takes this basic formula place house writing and examines how lifestyle and ritual are associated with place house and writing In addition this triad also is seen to work its way forward in different historical times and pressures Quigley examines the different political social and architectural pressures felt by these writers in the 19th and early and late 20th centuries The conclusion of this study points forward however as the title of the last chapter suggests Alternative Futures Quigley takes as his guiding theme throughout two polar thoughts from Thoreau that govern the writers under examination as well as Quigley s approach Thoreau championed the heroic virtue of the imagination in practical terms by urging folks to move confidently in the direction of one s dreams By doing so if one endeavors to live the life he has imagined he will meet with a success unexpected in common hours Again the practical and the imaginative are brought together with Thoreau s other claim that it is vain to sit down to write when you have not stood up to live Nature war individualism love family stone wood glass ocean mountains farming community and more come together in this broad ranging discussion This is a book about writers in place but it also is about rethinking how we might live the best lives we can every day Essentially this book addresses the long standing question And how shall we live <http://housesinthepoeticwild.org>
