HADI NEONATAL CLINIC COMPANION DR.ABDELHADI ABDELGABBAR

ABDELHADI, The neonatal clinic is an enjoyable yet challenging experience for the beginners as well as the experts The execution of a thorough assessment is easier in the setting of the Neonatal Unit environment where multiple players in the team are always there to plug any gaps you may have missed Furthermore the context of the clinic is totally different from the scene in NICU The conditions presenting to the clinic may bear no relevance to the usual medical problems encountered while the newborn is still in the hospital Furthermore many neonatal conditions come to light only after discharge while others require different approach as the acute condition s ramifications are endless The parents are usually well prepared to explore all the aspects of the presenting condition They expect to leave the clinic with satisfactory explanations and amicable solutions Small issues may cause them great anxiety if the clinician is not able to reassure them factually confidently and honestly They do not expect or imagine the condition may also be new to the clinician Systemic approach always pays dividends A thorough history is the key to unlock most issues This requires a good listener sound background knowledge and experience to extract the relevant facts during the short time slot available in the clinic The assessment is always deficient if the examination is hurried and limited to a targeted system Head to toe front and back examinations are mandatory Tailored investigation if necessary complete the picture This book HADI NEONATAL CLINIC COMPANION is intended to help the trainees in Neonatology as well as the well established Neonatologist to gather their thoughts during the neonatal clinic I have tried to spell out the steps required to tackle many presentations I have left out some follow up issues of major challenges stemming from NICU like Chronic Lung Disease Neonatal Fits Post Haemorrhagic Hydrocephalus and NEC I may add these to next edition if I find a suitable formula to present the follow up requirements Most problem solving frames within this book reflects my own approach which may be different to other Neonatologist s approaches Please feel free to email me at hadihuda yahoo com if you feel an alterations corrections additions or omissions are necessary I would welcome colleagues who would like to author new topics or rewrite existing topics

Key Topics in Neonatology Richard H.

Mupanemunda,Michael Watkinson,1998-06-15 Completely revised the second edition of Key Topics in Neonatology provides a practical systematic reference for all the major topics in neonatal medicine Practical and easy to use the book retains the same well received format as the first edition updates subject matter where significant recent developments have taken place and widens the scope of the text by adding entirely new coverage Distilling this large body of information into compact yet clear topics the authors provide succinct reviews of issues that are often skimmed over in similar sized texts This is the resource you will want on hand to solve the complex issues you face on a daily basis New topics include Abdominal Wall Defects Breast Feeding Cerebral Palsy Hearing Screening Hepatitis C Metabolic Acidosis Outcomes of Neonatal Intensive Care Updated topics include Childbirth Complications and Fetal Outcome Chromosomal Abnormalities Chronic Lung Disease Complications of Mechanical Ventilation Congenital Malformations and Birth Defects Death of a Baby Extreme Prematurity
