International Labor and Working Class History, 1999 Beyond Whiteness
 Jonathan Karp, 2023-12-15
 The concept of ethnicity once in vogue has largely gone out of fashion among twenty-first century social scientists, now replaced by models of assimilation defined in terms of the construction of whiteness and white supremacy. *Beyond Whiteness: Revisiting Jews in Ethnic America* explores the benefits of reconfiguring the ethnic concept as a tool to analyze the experiences of twentieth-century American Jews, not only in relation to other white groups of European descent but also African Americans and Asian Americans among others. The essays presented here, ranging from comparative studies of Jews and Asians as model minorities to the examination of postethnic Jews of color, demonstrate that expanding ethnicity beyond the traditional Eurocentric frame can yield fresh insights into the character of Jewish life in the modern United States.

How To Do Politics With Art
 Violaine Roussel, Anurima Banerji, 2016-10-26
 A major issue in the relation of art to the rest of society is the question of how art penetrates politics. From the perspective of most art scholars, this is a question of aesthetics: whether politics necessarily pollutes and debases the quality of the arts. From the perspective of social science, it has been primarily a question of meaning: how political messages are conveyed through artistic media. Recent work has begun to broaden the study of the arts and politics beyond semiosis and content focus. Several strands of scholarship are converging around the general issue of the social relationships within which art takes political form: that is, how art and artists do politics. This perspective of doing moves analysis beyond addressing the meaning of culture to focus on the ways that art is embedded in and intervenes in social relationships, activities, and institutions. This volume brings together an interdisciplinary group of scholars from France and the United States to investigate these directions and themes by exploring the question of how to do politics with art from a comparative standpoint, putting sociological approaches in conversation with other disciplinary prisms. It will be of interest to scholars of social movements and politicization, the sociology of art, art history, and aesthetics.

Jews and Science Sander L. Gilman, 2022-12-15
Jews and Science examines the complicated relationship between Jewish identities and the evolving meanings of science throughout the history of Western academic culture. Jews have been not only the agents for study of things Jewish but also the subject of examination by scientists across a range of disciplines, from biology and bioethics to anthropology and genetics. Even the most recent iteration of Jewish studies as an academic discipline, Israel studies, stresses the global cultural, economic, and social impact of Israeli science and medicine. The 2022 volume of the Casden Institute's Jewish Role in American Life series tackles a range of issues that have evolved with the rise of Jewish studies throughout its evolution from interdisciplinary to transdisciplinary and now finally as a discipline itself with its own degrees and

departments in universities across the world This book gathers contributions by scholars from various disciplines to discuss the complexity in defining science across multiple fields within Jewish studies The scholars examine the role of the self defined Jewish scholar discerning if their identification with the object of study whether that study be economics criminology medicine or another field entirely changes their perception or status as scientists They interrogate whether the myriad ways to study Jews and their relationship to science including the role of Jews in science and scientific training the science of the Jews however defined and Jews as objects of scientific study alter our understanding of science itself The contributors of Jews and Science take on the challenge to confront these central problems *The Cumulative Book Index* ,1999 International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,1999 **American Book Publishing Record** ,2000-07 Bibliographic Index ,2001 *Claiming the City* Marya McQuirter,2000 **New Trends in the Study of Haredi Culture and Society** David N. Myers,Nechumi

Malovicki-Yaffe,2024-12-15 Who are Haredim And why are they the source of both increasing attention and continuing misunderstanding New Trends in the Study of Haredi Culture and Society draws on the innovative research of leading scholars from a variety of disciplines including history religious studies demography linguistics and geography to trace the growing prominence of Haredi often called ultra Orthodox Jews in Jewish life Haredi Jews are committed to preserving a measure of segregation from the rest of society consistent with the guiding principles of their forebears yet increasingly they are appearing more visibly and assertively in public spaces Demographic analysis suggests that they will constitute a much larger share nearly one quarter of the world Jewish population over the next twenty years By examining the evolution of political cultural and social trends in Haredi communities across the globe this interdisciplinary and transnational volume sheds important light both on Haredi communities and on the societies of which they are part **LLT** ,2000 **Labor** ,2004
