Working On A Miracle:

Working on a Miracle Mahlon Johnson, Joseph Olshan, 1997 Dr Mahlon Johnson had devoted his life to neuropathology the detailed laboratory investigation of nervous system diseases During a routine brain autopsy of an AIDS victim suddenly with one slip of the scalpel he went from doctor to patient a patient battling for his life against HIV Ever the researcher he began to chronicle his illness charting his blood counts constantly to track the course of his infection Within a year it appeared he was a rapid progressor one of the unlucky minority who swiftly advance toward AIDS Now in a race against time Johnson began searching for treatments ferreting out every new study that could offer hope Guided by the discoveries of the top AIDS researchers in the country he made himself a guinea pig like Louis Pasteur experimenting with an aggressive treatment regimen combining different kinds of drugs the few antivirals available at the time and the immune system boosting but potentially toxic cancer treatment IL 2 Soon amazingly his blood counts which had plummeted unnervingly to around 300 soared above 1000 to the high normal range and HIV could no longer be isolated in his blood even by the most sensitive tests Unsure how to interpret these unusual findings he kept fighting adding protease inhibitors to his regime as soon as they became available And now four and a half years after his infection with HIV his blood remains free of any detectable virus He is living proof of what many researchers have come to believe that HIV may no longer be an inevitable death sentence BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Decisions and Orders of the National Labor Relations Board* United States.
