Saying No to Jugaad T N Hari, M S Subramanian, 2019-10-07 Saying No to Jugaad is a riveting account of how the start up ecosystem in India evolved rapidly in the last 10 years Ushering in a new turn in the country s economy that shook up existing ways of doing business start ups brought together investors and a rare breed of entrepreneurs to create a set of unicorns focused for the first time on solving the country s problems The book busts some of the common myths around e commerce businesses and describes the evolution of grocery as the mother of all categories in this sector It also is the story of how start ups go through different distinct stages as they evolve and mature The courage needed to hold your ground when the world seems to have a contrarian view the relentless focus on customer centricity and the emphasis on foundation building are illustrated through lucid and stirring stories Entertaining and anecdotal the book is not a panegyric about the founders or the company but is the story of real people and a real company

with real flaws but also several great ideas and moments Saying No to Jugaad vividly captures the vision culture and commitment to values which has made Bigbasket one of India's most successful start-ups Twenty Years of Life Suzanne Bohan, 2018-04-19 In Twenty Years of Life Suzanne Bohan exposes the ugly truth that health is largely determined by zip code Life expectancies in wealthy versus poor neighborhoods can vary by as much as twenty years Bohan chronicles a bold experiment to challenge that inequity The California Endowment one of the nation's largest health foundations is upending the old school top-down charity model and investing 1 billion over ten years to help distressed communities advocate for their own interests With compassion and insight Bohan shares stories of students and parents former street shooters urban farmers and a Native American tribe who are tapping into their latent political power to make their neighborhoods healthier Their stories will fundamentally change how we think about the root causes of disease and the prospects for healing
