WORKSHOP MANUAL Floyd Clymer,Velocepress,2022-08-26 260 pages and more than 290 illustrations and charts size 8
25 x 10 75 inches This publication is a reproduction of the Triumph factory workshop manual part number 99 0843 0948
0950 The original workshop manual part number 99 0843 was subsequently updated and merged with workshop manual 99
0948 This merged double manual also included a supplement part number 99 0950 which extended the coverage up to the
1974 models The supplement was appended to the double manual such that Section A Lubrication System is followed by a
Section AA Lubrication System supplement and Section B Engine is followed by a Section BB Engine supplement etc etc This
combination of 99 0843 0948 0950 was published as a single workshop manual applicable to the entire range of 350cc and
500cc unit construction twins from 1963 through 1974 This reprint is a faithful reproduction of that combination manual
There were a number of running changes made throughout the 11 year production run of these models and the way the
factory identifies the point where those changes took place is by referencing engine numbers within each individual section
of this manual To assist in identifying the appropriate information applicable to those changes the supplements were
appended to the end of each appropriate section Consequently it is important to note with regard to any maintenance and
repair instructions and also the specifications in the General Data GD section that wherever engine numbers are stated the
data will be specific to that particular series Therefore the reader is encouraged to read the entire section plus the
supplemental section prior to commencing any work paying close attention to any engine number notations Owners of the
350cc and 500cc machines are subjected to considerable confusion surrounding the appropriate selection of the multitude of
originals and reprints of the various 350cc and 500cc manuals that have recently flooded the online marketplace Based on
our research at least six manuals were issued for different series of engine numbers throughout the 11 year production run
However the 99 0843 0948 0950 combination manual is the most comprehensive manual for the entire line of 350cc and
500cc unit construction twins produced from 1963 to 1974 It covers all engine numbers from H29733 through H67331 plus
the later 1969 through 1974 alpha numeric series engine numbers unfortunately it is somewhat scarce and difficult to find In
addition many of the changes made towards the end of the production run necessitate the use of the supplement and we are
pleased to offer this reprint of the combination manual as a service to all Triumph 350cc and 500cc unit construction owners

Pearson Ltd of London UK There are very few workshop manuals that deal with the early single cylinder Triumph motorcycles This is likely due to the fact that in 1945 at the end of WW2 when Triumph resumed production of their civilian line of motorcycles they discontinued the manufacture of single cylinder machines From that point onwards they concentrated on their twin cylinder models and it was not until 1952 that Triumph announced another single the 150cc T15 Terrier SINGLE CYLINDER ALL MODELS 1937 1945 When this manual was originally published in 1949 its primary focus was on the 1937 to 1945 single cylinder motorcycles which included a war surplus market that was well stocked with ex military singles Models covered are 2H 2HC 3S 3SE 3SW 3H 3HW 5S 5SE 5SW 5H 6S T70 T80 T90 The bulk of these machines were based on a design that dates back to 1934 which also makes this manual of use to owners of those earlier Triumph singles TERRIER TIGER CUB 1953 1961 Ultimately the 1961 5th edition of this manual was revised and expanded to include the 1953 1961 Terrier and Tiger Cub models The information included is appropriate for all T15 T20 T20C T20S models fitted with an external distributor The engine section includes the 1960 change to energy transfer ignition plus the change at engine number 57617 when the split line between the main castings was moved to the center line of the cylinder Many Triumph enthusiasts consider that the external distributor Tiger Cub models brought the true Triumph single cylinder line to a conclusion This is further supported by the fact that the final workshop manual for the T15 T20 T20C T20S published under the Triumph name was the August 1964 manual No 8 part number 906 64 which only included the external distributor models In addition under BSA ownership the Tiger Cub engine had previously been utilized as the basis for the 1959 BSA C15 and ultimately by the BSA Bantam Cub series from 1966 onwards Unfortunately Triumph motorcycle owners are subjected to considerable confusion surrounding the appropriate selection from the multitude of originals and reprints of the various manuals that have recently flooded the online marketplace We encourage you to exercise caution when purchasing a manual for your motorcycle or automobile as many of the reprints found on internet websites are from bedroom sellers at enticingly low prices by individuals that really have no idea what they are selling Many are nothing more than poor quality comb bound photocopies that are scanned and printed complete with greasy pages and thumbprints and as such are deceptively described as pre owned used or even refurbished In addition they are often advertised for the incorrect series and or model years **Triumph 650 & 750 Twins** Jeff Clew,1973
