Artificial Intelligence Can Benefit Mankind Nicholas P. Ginex, 2020-08-18 Artificial Intelligence AI is an exceptional tool that increases production output of goods and services but its automated capabilities have caused the loss in jobs affecting the livelihood of millions of American workers. A great concern is the direction in the use of AI that affects the mental and physical health of the public. Some billionaires are using AI to surreptitiously control the thoughts of people and are developing ways to vaccinate people for biological control as well. This book provides a path, a solution that will be very challenging but entirely warranted by using AI to give every American an opportunity to use their gifts and enjoy a quality of life that has never before been achieved for an entire people of one country

Space Law Thomas Leclerc, 2024-02-06 Outer space is subject to a legal framework; there is a set of rules specifically dedicated to outer space and to the activities carried out there. These rules have developed since 1957, the year the first artificial satellite was launched. Major changes have also affected the technology used and the actors involved as well as the domains concerned by the exploration and use of outer space. Space Law will lay out the progressive densification of the legal framework that is applicable to outer space and the activities that are carried out there. Without claiming to be exhaustive, the aim of this book is to present the main primary sources of space law, its main principles, the diversity of its fields of application, and the challenges and issues that the development of space activities inevitably raises

Why Science?: To Know, To Understand, And To Rely On Results Roger G. Newton, 2012-05-31 This book aims to describe for readers uneducated in science the development of humanity's desire to know and understand the world around us through the various stages of its development to the present when science is almost universally recognized at least in the Western world as the most reliable way of knowing. The book describes the history of the large-scale exploration of the surface of the earth by sea, beginning with the Vikings and the Chinese, and of the unknown interiors of the American and African continents by foot and horseback. After the invention of the telescope, visual exploration of the surfaces of the Moon and Mars were made possible, and finally a visit to the Moon. The book then turns to our legacy from the ancient Greeks of wanting to understand rather than just know, and why the scientific way of understanding is valued. For concreteness, it relates the lives and accomplishments of six great scientists: four from the

nineteenth century and two from the twentieth Finally the book explains how chemistry came to be seen as the most basic of the sciences and then how physics became the most fundamental

Jacques Maritain and the Many Ways of Knowing Douglas A. Ollivant,2002 Drawing on the writings of Jacques Maritain and by extension those of Thomas Aquinas the essays in this volume examine the effects of theories of knowledge on individuals culture and entire schools of philosophical thought The contributors challenge contemporary epistemologies which are largely based on writings of Descartes Locke and Kant They critique these theories internally and demonstrate their incompatibility with other

goods such as liberty human dignity and access to the transcendent In stark contrast to modernity's dubious and fragmented opinions and belief systems Maritain in works like *The Degrees of Knowledge* and *Creative Intuition in Art and Poetry* proposed a theory of knowledge that permits real if limited knowledge of substances wholes Some contributors use these works as a springboard from which to examine aspects or applications of knowledge that Maritain left unexplored Others challenge or question aspects of Maritain's analysis seeking to improve upon his work Still others compare Maritain with other neo Thomistic philosophers most notably Etienne Gilson Alasdair MacIntyre and Pope John Paul II Maritain's works on human knowledge and the implicit critique of modernity contained within provide an alternative for those seeking to engage the various deficiencies of the culture of death These essays demonstrate the continuing relevance and timeliness of Maritain's thought Douglas A Ollivant is assistant professor of politics at the United States Military Academy Contributors George Anastaplo James Arraj Joseph M de Torre Robert Delfino Raymond Dennehy John M Dunaway Robert Fallon Desmond FitzGerald William J Fossati W Matthews Grant Catherine Green James G Hanink Gregory J Kerr John F X Knasas John F Morris Ralph Nelson Douglas A Ollivant Matthew S Pugh Steven J Schloeder Christopher H Toner John G Trapani Jr Henk E S Woldring and Thomas F Woods This is a valuable collection of articles on an important individual who is still influencing contemporary political thought Lucien J Richard OMI Catholic Library World
