Family and Marital Psychotherapy (Psychology Revivals) Sue

Walrond-Skinner, 2014-01-09 The family therapy movement had from its earliest days been marked by a surge of creativity and by the energy of the new ideas it generated Originally published in 1979 the authors of the original essays collected together in this book felt that the time had come to take stock and to scrutinise more carefully the meaning and effectiveness of this new psychotherapeutic method within the particular conditions prevailing Britain at the time The book focuses on issues relating to theory research and practice and while concentrating on three sub specialities of family therapy family group therapy marital therapy and network therapy the papers cover a wide variety of topics In addition to papers by practitioners and teachers of family therapy two contributions are included from the field of academic psychology Before this much of the family therapy literature had been presented in the form of an uncritical eulogy of the method The special interest of this book lies in its attempt to bring a critical perspective to bear upon family therapy and its application Moreover in contrast with much that had been previously written the authors sought to make a distinctive contribution to the development of family therapy through their effort to integrate rather than to polarise what is valuable within a variety of different theoretical and empirical approaches

Foundations and Applications of Decision Theory C.A. Hooker, J.J. Leach, E.F. McClennen, 1978-04-30 1 INTRODUCTION

In the Spring of 1975 we held an international workshop on the Foundations and Application of Decision Theory at the University of Western Ontario To help structure the workshop into ordered and manageable sessions we distributed the following statement of our goals to all invited participants They in turn responded with useful revisions and suggested their own areas of interest Since this procedure provided the eventual format of the sessions we include it here as the most

appropriate introduction to these collected papers resulting from the workshop. The reader can readily gauge the approximation to our mutual goals.

2 STATEMENT OF OBJECTIVES AND RATIONALE

Attached to this statement is a bibliography of names of persons cited in the statement and writing in this century will be found referenced in the bibliography certain classics.

Side 2 1 Preamble

We understand in the following the Theory of Decisions in a broader sense than is presently customary, construing it to embrace a general theory of decision making including social, political, and economic theory and applications. Thus we subsume the Theory of Games under the head of Decision Theory regarding it as a particularly clearly formulated version of part of the general theory of decision making.

Social Science David C. Colander, 2016-09-13

Social Science An Introduction to the Study of Society 16e approaches social science from a common sense perspective rather than from a conventional social science angle. Readers will see how seemingly diverse disciplines intermingle: anthropology and economics, for example. The goal of the book is to teach students critical thought and problem solving skills that will allow them to approach social issues in an unbiased manner. New to this edition are significant updates on Race and the police, More comparison contrasts of deviance and criminality, Alternative pathways in criminal justice, new technology such as self-driving cars, Gay marriage, American political dynasties, Refugee and immigration issues in Europe, globally American political dynasties, China's growing power, New trade initiatives, States in the Middle East, Nuclear arms control. Expanded web-based ancillaries for students and teachers.

The International Encyclopedia of Curriculum A. Lewy, 1991-04-10

The International Encyclopedia of Curriculum is a unique collection of analytical and empirical studies on curriculum-related issues. Its 280 articles authored by experts from 22 countries are grouped in two sections. The first, Curriculum as a Domain of Enquiry, contains articles dealing with general topics in this field. The second, Specific Study Areas, contains articles on more than 120 subjects currently taught in schools. It is the first attempt to provide in a single volume a comprehensive review of approaches and problems related to teaching traditional school subjects such as mathematics, history, and classical languages, as well as the innovative ones such as film studies, women's studies, communication skills, set theory in mathematics, and energy education. The book is an invaluable tool for educationists, educational administrators, supervisors, researchers, policy makers, and curriculum planners, and a source of information and inspiration for teachers and school-level curriculum coordinators.
