United Nations Peacekeeping Operations Ad Hoc Missions Permanent Engagement:

United Nations Peacekeeping Operations Ramesh Chandra Thakur, Albrecht Schnabel, 2001 Features current United Nations peacekeeping operations with information provided by the Peace and Security Section of the United Nations Department of Public Information Provides background details and links to an interactive map of current operations The Human Rights Treaty Obligations of Peacekeepers Kjetil Mujezinović Larsen, 2012-07-12 Do States through their military forces have legal obligations under human rights treaties towards the local civilian population during UN mandated peace operations It is frequently claimed that it is unrealistic to require compliance with human rights treaties in peace operations and this has led to an unwillingness to hold States accountable for human rights violations In this book Kjetil Larsen criticises this position by addressing the arguments against the applicability of human rights treaties and demonstrating that compliance with the treaties is unrealistic only if one takes an all or nothing approach to them He outlines a coherent and more flexible approach which distinguishes clearly between positive and negative obligations and makes treaty compliance more realistic His proposals for the application of human rights treaties would also strengthen the legal framework for human rights protection in peace operations without posing any unrealistic obligations on the military forces **Sex in Peace Operations** Gabrielle Simm, 2013-04-25 This book critically re evaluates the problem of sex between international personnel and local people and offers regulatory solutions to legal problems **The Prevention and Intervention of Genocide** Samuel Totten, 2008-03-31 This volume is comprised of over 2 300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science sociology history and psychology to enable specialists in genocide studies peace studies and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect Among the topics included are key conventions international treaties and covenants genocide early warning signals and forecasting risk data bases sanctions peacekeeping missions conflict resolution the International Criminal Court realpolitik vis vis the issue of genocide prevention and intervention key non governmental agencies key governmental and UN bodies working on these important issues In addition to the annotations Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide raising a host of critical issues regarding the strengths weaknesses and limitations of various approaches germane to issues of managing these conflicts *Liberal Peace Transitions* Oliver P Richmond, 2011-04-06 A critical assessment of current liberal approaches to post conflict statebuilding with constructive suggestions as to where improvements might be made Newly available in paperback *Peacebuilding in the United Nations* Fernando Cavalcante, 2019-05-06 This book traces the trajectory and different meanings of the concept of peacebuilding in the United Nations since the early 1990s It analyses how that concept gained

life in a particular context and the implications of this process for the Organisation's support to societies affected by armed conflict in general and for peace operations in particular. Departing from tenets about the influence of ideas in world politics and engaging with the critique of the liberal peace scholarship, the book provides a theoretically informed narrative of how peacebuilding acquired different meanings while remaining largely motivated, justified, legitimated and informed by a proactive and top-down agenda of promoting liberal democratic institutions, norms and values as a remedy to the challenges faced by societies affected by armed conflict. The book will appeal to scholars, policymakers and practitioners in peacebuilding and post-conflict development.

The Oxford Handbook of the Use of Force in International Law Marc Weller, 2015-01-15. The prohibition of the use of force in international law is one of the major achievements of international law in the past century. The attempt to outlaw war as a means of national policy and to establish a system of collective security after both World Wars resulted in the creation of the United Nations Charter, which remains a principal point of reference for the law on the use of force to this day. There have, however, been considerable challenges to the law on the prohibition of the use of force in international law in the past century. The attempt to outlaw war as a means of national policy and to establish a system of collective security after both World Wars resulted in the creation of the United Nations Charter, which remains a principal point of reference for the law on the use of force to this day. There have, however, been considerable challenges to the law on the prohibition of the use of force over the past two decades. This Oxford Handbook is a comprehensive and authoritative study of the modern law on the use of force. Over seventy experts in the field offer a detailed analysis and, to an extent, a restatement of the law in this area. The Handbook reviews the status of the law on the use of force and assesses what changes, if any, have occurred in consequence to recent developments. It offers cutting-edge and up-to-date scholarship on all major aspects of the prohibition of the use of force. The work is set in context by an extensive introductory section reviewing the history of the subject, recent challenges and addressing major conceptual approaches. Its second part addresses collective security in particular, the law and practice of the United Nations organs and of regional organizations and arrangements. It then considers the substance of the prohibition of the use of force and of the right to self-defence and associated doctrines. The next section is devoted to armed action undertaken on behalf of peoples and populations. This includes self-determination, conflicts, resistance to armed occupation and forcible humanitarian and pro-democratic action. The possibility of the revival of classical expansive justifications for the use of force is then addressed. This is matched by a final section considering new security challenges and the emerging law in relation to them. Finally, the key arguments developed in the book are tied together in a substantive conclusion. The Handbook will be essential reading for scholars and students of international law and the use of force and legal advisers to both government and NGOs.

Military Forces in 21st Century Peace Operations James V. Arbuckle,2006-09-27 As the antithetical relationships between the civilian and military agencies and components of modern peace operations are essentially cultural and are rooted in misinformation and prejudice effective civil military operations are needed from the outset of an operation

Decolonization, Sovereignty, and Peacekeeping Hanny Hilmy,2020-09-29 This book analyses three major themes decolonization sovereignty and peacekeeping Their interaction during the national liberation struggle during the Cold War culminating in the 1956 Suez War addresses the principle of national sovereignty after World War II in the framework of the UN Charter The new peacekeeping operations were used in many conflicts during which the Charter s theory and application were tested The rise of the USA as the key Western power and Israel s special role in the Middle East have created a new confrontational dynamic for the entire region The interaction between the book s main themes in the field has led to the principles of peacekeeping in international and national conflicts being reviewed in light of the discredited Capstone Doctrine The author argues that state sovereignty is sacrosanct but humanitarian interventions are equally imperative in his view Striking the right balance is crucial for managing conflicts The author offers a well informed historical account and an authoritative political analysis was exposed to UNEF deployments and termination and knows key peacekeeping actors draws on original documents memoirs and interviews includes unpublished photos and previously unavailable documentary material has experience in government and academia

Impediments to the Prevention and Intervention of Genocide Samuel Totten,2013 Academics NGOs the United Nations and individual nations are focused on the prevention and intervention of genocide Traditionally missions to prevent or intervene in genocide have been sporadic and under resourced The contributors to this volume consider some of the major stumbling blocks to the avoidance of genocide

Bartrop and Totten argue that realpolitik is the major impediment to the elimination of genocide Campbell examines the lack of political will to confront genocide and Theriault describes how denial becomes an obstacle to intervention against genocide Loyle and Davenport discuss how intervention is impeded by a lack of reliable data on genocide violence and Macgregor presents an overview of the influence of the media Totten examines how the UN Convention on Genocide actually impedes anti genocide efforts and how the institutional configuration of the UN is itself often a stumbling block Addressing an issue that is often overlooked Travis examines the impact of global arms trade on genocide Finally Hiebert examines how international criminal prosecution of atrocities can impede preventive efforts and Hirsch provides an analysis of the strengths weaknesses and effectiveness of major international and national prescriptions developed over the last decade The result is a distinguished addition to Transaction's prestigious Genocide Studies series *The Responsibility to Protect* International Commission on Intervention and State Sovereignty, International Development Research Centre (Canada), 2001 Responsibility to Protect Research bibliography background Supplementary volume to the Report of the International Commission on Intervention and State Sovereignty **India and International Law: Introduction** Bimal N. visions of security during the Cold War and earlier periods and provides numerous points of comparison with the dominant causes types strategy and prosecution of warfare in other eras International Conflict Management will be essential reading for all students of conflict management mediation peacekeeping peace and conflict studies and international security in general Michael J Butler is an Assistant Professor in the Department of Government and International Relations at Clark University USA

Advocacy and Change in International Organizations Kseniya Oksamytna, 2023-09-14 How do international organizations change Many organizations expand into new areas or abandon programmes of work Advocacy and Change in International Organizations argues that they do so not only at the collective direction of member states Advocacy is a crucial but overlooked source of change in international organizations Different actors can advocate for change national diplomats international bureaucrats external experts or civil society activists They can use one of three advocacy strategies social pressure persuasion and authority talk The success of each strategy depends on the presence of favourable conditions related to characteristics of advocates targets issues and context Institutionalization of new issues in international organizations as a multi stage process often accompanied by contestation This book demonstrates how the advocacy focused framework explains the origins of three workstreams of contemporary UN peacekeeping operations communication protection and reconstruction The issue of strategic communications was promoted by UN officials through the strategy of persuasion Protection of civilians emerged due to a partially successful social influence campaign by a coalition of elected Security Council members and a subsequent and successful persuasion efforts by Canada Quick impact projects entered peacekeepers practice as the result of authority talk by an expert panel The three issues illustrate the diversity of pathways to change in international organizations representing the top down bottom up and outside in pathways Moreover they have achieved different degrees of institutionalization in UN s policies structures and frameworks protection of civilians is the most institutionalized as evidenced by measures to hold peacekeepers accountable for non implementation while quick impact projects are the least

institutionalized **Games of Conflict and Cooperation in Asia** Motoshi Suzuki, Akira Okada, 2017-02-07 This edited volume is an outcome of the first major collaborative project between Japanese economists and political scientists funded by the Japan Society for the Promotion of Science. The authors of the individual chapters show that Asian states play games of conflict and cooperation strategically by creating, changing or destroying institutions. For them, conflict and cooperation are inseparable phenomena and are integral parts of states' strategic interactions under constraints. Through the establishment of appropriate institutions that coordinate states' actions, present conflict can be turned into stable cooperation in the future. No discernible difference exists in the extent of rationality between the East and the West, but substantial variations between regions or even within a region are found in institutions that are influenced by history and culture. Historical and cultural variations divide contemporary Asia, making regional institutional cooperation difficult and prompting some Asian states to use global or inter-regional arrangements in order to obtain benefits of cooperation. Qualifications are provided for this line of argument in the first chapter, which also discusses the affinity of international relations theory and game theory, with special attention to Japan and Asia. The following ten substantive chapters are developed based on the conceptual framework and for integrity and coherence are sub-grouped into four parts that correspond to major issues in international relations scholarship: 1. conflict management, 2. arms control, 3. trade and 4. currency.

Internal Security and Statebuilding B. K. Greener, W. J. Fish, 2014-11-27 This book examines international efforts to provide security in post-conflict sites and explains why internal security should be given precedence in statebuilding endeavours. The work begins by exploring the evolution of security sectors in mature liberal democratic states, before examining the attempts of such states to accelerate that evolutionary process in post-conflict sites through statebuilding and security sector reform. These discussions suggest interestingly different answers to the question of who should provide for internal security in international operations. When considering mature states, there are both practical and normative reasons as to why internal security has become the sole domain of police, with military forces being excluded from internal affairs. In peace and stability operations, on the other hand, difficulties with utilising police personnel have led to military forces being required to play internal security roles. This tension is investigated further through detailed case studies of three recent missions: Afghanistan, Timor-Leste and Solomon Islands. These case studies both reinforce and augment the practical and normative reasons for ensuring that internal security remains the domain of police. This then impacts upon peace and stability operations in two important ways. If we are to provide enduring security in post-conflict sites, we should both i) prioritise internal security agencies in security sector reform efforts and ii) prioritise ways of enabling police to play internal security roles in the contributing mission. This book will be of much interest to students of statebuilding, peace and conflict studies, military studies, police studies, historical sociology, security studies and IR in general.

Diplomacy and Borderlands Katharina Coleman, Markus Kornprobst, Annette Seegers, 2019-10-28 This book examines Africa's internal and external relations by focusing on three core concepts: orders

diplomacy and borderlands The contributors examine traditional and non traditional diplomatic actors and domestic regional continental and global orders They argue that African diplomats profoundly shape these orders by situating themselves within in between spaces of geographical and functional orders It is in these borderlands that agency despite all kinds of constraints flourishes Chapters in the book compare domestic orders to regional ones and then continental African orders to global ones They deal with a range of functional orders including development international trade human rights migration nuclear arms control peacekeeping public administration and territorial change By focusing on these topics the volume contributes to a better understanding of African international relations sharpens analyses of ordering processes in world politics and adds to our comprehension of how diplomacy shapes orders and vice versa The studies collected here show a much more nuanced picture of African agency in African and international affairs and suggest that African diplomacy is far more extensive than is often assumed This book will be of much interest to students of diplomacy studies African politics and International Relations
