new courses and studies that are closely aligned to the needs of students. It supports the integration of new technologies without overburdening teachers and staff. Lean in the Classroom brings all these elements together into a coherent framework so schools can make necessary changes in one concerted effort. Teaching professional support managing the daily work and changing the way schools function are brought together as a schoolwide strategy to organize learning in a way that serves our students by making the most of their talents. This book is the first to define LE in all its aspects: course design, actual teaching and learning processes, school management and the organization of supporting processes. It is firmly based on the Lean management philosophy in conjunction with pedagogy. The book draws on both scientific research in the field of Lean management in general and Lean education in particular.
