Consumable Metaphors Ceri Crossley, 2005 This book studies the various definitions of animal nature proposed by nineteenth century currents of thought in France It is based on an examination of a number of key thinkers and writers some well known for example Michelet and Lamartine others largely forgotten for example Gleizes and Reynaud At the centre of the book lies the idea that knowledge of animals is often knowledge of something else that the primary referentiality is overlaid with additional levels of meaning In nineteenth century France thinking about animals their future and their past became a way of thinking about power relations in society for example about the status of women and the problem of the labouring classes This book analyses how animals as symbols externalize and mythologize human fears and wishes but it also demonstrates that animals have an existence in and for themselves and are not simply useful counters functioning within discourse Dictionary of Untranslatables Barbara Cassin, Emily Apter, Jacques Lezra, Michael Wood, 2014-02-09 Characters in some languages particularly Hebrew and Arabic may not display properly due to device limitations Transliterations of

Shelley's Visions of Death Andrew Lacey, 2024-02-27 This book provides the first modern in depth analysis of Percy Bysshe Shelley s engagement with the phenomenon of death It argues that for Shelley this most nebulous of realities represents first and foremost possibility Shelley s poetic writings on death are both numerous and varied presenting his reader with differing degrees of confidence over the course of his brief but brilliant career with several key visions of what death might be or actually is Shelley s Visions of Death stresses the seldom appreciated fact that death was one of Shelley s most enduring preoccupations and also demonstrates the poet s power to imagine with startling variety that which lies beyond the boundaries of experience

Medieval French on the Move Leah Tether, Patrick Moran, Anne Salamon, 2025-03-17 When Keith Busby published his field shaping *Codex and Context* in 2002 the work was referred to as groundbreaking and monumental It prompted scholars of medieval literature to return to manuscripts in their droves However Busby s *Codex and Context* would also enact another more gradual movement His formulation of the term medieval Francophonia to describe

the presence power and effect of French outside France would filter steadily into academic enquiry The term and concept are now widely recognised and applied in global scholarship including in multiple major projects dedicated to the topic This volume brings together a series of cutting edge studies of medieval Francophonia covering in one place and for the first time the fullest scope of the concept s remit with contributions on history historiography language literature culture society and authority At the same time as offering a timely contribution to the field this volume pays tribute to Busby s life work not only to pioneer medieval Francophonia but also and moreover to encourage the study of the medieval through material philology Each of the studies here written by Busby s friends and colleagues thus roots its approach in a material context *The Americanization of France* Barnett Singer,2013-04-18 This engaging knowledgeable book traces the American path France has followed since resolving its searing Algerian conflict in 1962 Barnett Singer convincingly demolishes two pervasive clichés about modern France first that the country never has been fit to fight wars including wars on terror and second that the French have always been and remain overwhelmingly anti American Drawing on a wealth of archival sources Barnett Singer clearly demonstrates that a serious and organized France fought strongly until its own divisions international pressures and the actions of de Gaulle ended the conflict with tragic consequences The outcome led to an important sea change clearing the way for France to embrace American culture especially rock n roll and more generally an American style emphasis on personal happiness The author argues that today s France wounded by the loss of traditions and stability is increasingly pro American clinging to trends from across the Atlantic as to a lifeline *Animal Worlds* Laura McMahon,2019-05-29 Focusing on a recent wave of international art cinema *Animal Worlds* offers the first sustained analysis of the relations between cinematic time and animal life Through an aesthetic of extended duration films such as *Bestiaire* 2010 *The Turin Horse* 2011 and *A Cow s Life* 2012 attend to animal worlds of sentience and perception while registering the governing of life through biopolitical regimes Bringing together Gilles Deleuze s writings on cinema and on animals while drawing on Jacques Derrida Jean Christophe Bailly Nicole Shukin and others the book argues that these films question the biopolitical reduction of animal life to forms of capital opening up realms of virtuality becoming and alternative political futures Nouveau dictionnaire universel de la langue française Prosper Poitevin,1860 **A Critical Bibliography of French Literature** David Clark Cabeen,Urban Tigner Holmes,1980
