to Visual Journalism Nicole Dahmen, T.J. Thomson, 2025-09-02 Representing the first collection of its kind, *The Routledge Companion to Visual Journalism* introduces fundamental topics and ideas, delineates the diversity and complexity of this growing field, and creates a foundation for future scholarship and study. In the contemporary digital media landscape, still and moving images, interactive visualizations, and virtual reality are increasingly important to attract attention, cultivate engagement, inform and influence opinions, and provide a more emotive and immediate viewing experience for news audiences. This Companion draws together leading voices from academia and industry to survey this dynamic and ubiquitous mode and inspire dialogue. Along with an introduction and conclusion, the volume is structured in five sections and covers people and identities, practices and processes, technologies, equipment and forms, theories, concepts and values, and audience interpretation and impact. Beginning by looking at the history of visual news, chapters go on to explore how visual news is created, how journalists visually represent gender, race, sexuality, disability, elites, and ordinary citizens, key ethical ideas, and theories behind the creation of visual news, and how visual news is processed, drawing in research from eye tracking, media psychology, and media literacy. The book ends with a critical look at the future of the field. *The Routledge Companion to Visual Journalism* is a recommended resource for all advanced students and researchers of visual journalism and communication.
