Drawing Investigations Sarah Casey, Gerry Davies, 2020-06-11 Using close visual analysis of drawings artist interviews critical analysis and exegesis Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed How does drawing add shape to ideas How does the artist accommodate to challenges and restraints of a particular environment To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world urban environment social forces and lived experience Examples represent a spectrum of research in international contexts an oceanographic Institute in California the archives of Amsterdam's Rijksmuseum the Antarctic Survey geothermal research in Japan and the Kurdish diaspora in Iraq

Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents By exploring drawing's capacity to capture and describe experience to sharpen visual faculties and to bridge embodied and conceptual knowledge Drawing Investigations offers a fresh critical perspective on contemporary drawing practice

[Landscape and contemporary drawing](#) Matthieu Poirier,2008 Galerie Thaddaeus Ropac is pleased to announce a group exhibition curated by Matthieu Poirier The exhibition will bring together works by twenty artists of eight different nationalities to explore the notion of landscape Landscape the exhibition and book intend to call into question the art historical precedent of the correlation between landscape and drawing The exhibition thus assembles in two successive shows Paris and Salzburg over one hundred works often in atypical formats by artists for whom drawing is often

just one medium among others and landscape a non exclusive genre Under the neologic title Landscape a contraction of landscape and scope from the Greek skopein to behold to observe landscape is regarded as both a site and a view The landscapes brought together here are often natural yet reject conventional narrative or narcissistic themes As in the mirror like illustrations of Maeterlinck's dream of a theatre without actors these scenes systematically exclude all human presence and thus contribute to the establishment of a scenography of absence of a paradoxical phenomenology of emptiness Even if these landscapes are completely deserted they nevertheless remain event scenes paysages d'événements Paul Virilio genuine locations resulting most frequently from the collision of formal logical and scopic motivations rather than as a result of a narrative Chosen here for its manifest artificiality and its necessarily dialectic relationship with the world drawing appears as the indispensable tool for reconsidering this notion of landscape as well as the related themes of perspective space and representation It is not so much the spatial landscapes that are observed here but through their archetypal characteristics the very notion of landscape itself Press release
