Women In Power In Post Communist Parliaments:

Women in Power in Post-communist Parliaments Marilyn Rueschemeyer, Sharon L. Wolchik, 2009 This book examines the life and work of women who have reached positions of political power after the end of communism in Europe It explores the roles they have adopted the relationships they have cultivated and the agendas they have pursued This volume treats the issues comparatively in six countries the Czech Republic Germany with a focus on the former GDR Slovenia Bulgaria Poland and Russia It also includes interviews with and written statements by the very women in power discussed in the first half of the book giving voice to their common and divergent experiences as political actors within an environment of stormy economies and new foreign engagements particularly with the European Union **Women's Access to Political**

Power in Post-Communist Europe Richard E. Matland, Kathleen A. Montgomery, 2003-05-01 This book considers women's access to formal positions of powers in the newly formed democracies of post communist Europe While acknowledging the relevance of recent history this book takes an important step away from the communist legacy and explicitly argues for a framework based on causal variables identified in the existing literatures from industrialized democracies on women and politics and legislative recruitment After a brief introduction the second chapter sets forth a general theoretical framework which posits that the level of female legislative representation in a given country is a function of the relative supply of and demand for female candidates After a chapter considering a broad overview of public opinion on women and politics in Eastern Europe thirteen country chapters spanning the spectrum of Eastern European democracies address and test hypotheses about the key variables affecting the supply and demand sides of the equation in individual countries Relevant aspects of the communist cultural and developmental legacy are addressed but authors give particular attention to political factors such as electoral rules and the characteristics of the emerging party systems that vary within the Eastern European countries The new democracies of Eastern Europe provide a novel context in which to test and extend our theories about the consequences of political institutions for the quality of democracy Since institutional arrangements are more malleable than developmental or cultural characteristics those variables also offer the greatest promise to scholars and practitioners wondering what can be done to improve women's access to formal arenas of political power How can we build democracies that are stable lasting and representative A careful analysis of the post communist context can help us to address issues concerning institutional design and development that has relevance well beyond the Eastern European context **The**

Antić, Gabriella Ilonszki, 2003 **Women in Parliament** Julie Ballington, Azza M. Karam, 2005 This updated edition of Women in Parliament Beyond Numbers Handbook covers the ground of women s access to the legislature in three steps It looks into the obstacles women confront when entering Parliament be they political socio economic or ideological and psychological It presents solutions to overcome these obstacles such as changing electoral systems and introducing quotas and it details strategies for women to influence politics once they are elected to parliament an institution which is traditionally male dominated The first Women in Parliament Beyond Numbers handbook was produced as part of IDEA s work on women and political participation in 1998 Since its release in English in 1998 there has been an ongoing interest and demand for the handbook and responding to the request for the translation of the handbook IDEA has produced Spanish French and Indonesian language versions and a Russian overview of the handbook during 2002 2003 Since the first handbook was published the picture regarding women s political participation has slowly changed Overall the past decade has seen gradual progress with regard to women s presence in national parliaments This second edition incorporates relevant global changes in the past years presenting new and updated case studies **Sharing Power** Manon Tremblay, 2017-03-02 The representation of women in parliament is a subject of extensive research and a focus for political action in the last decade The wide variation in women s parliamentary presence contradicts the expectation that established or consolidated democracies are more supportive of the presence of women in political life than emerging democracies This volume explains this variation through a series of closely investigated case studies from the post Communist transition democracies of Eastern Europe and emerging democracies in Asia and the Middle East to the long established liberal democratic states The volume examines the history of women s legislative involvement clearly addressing the issue of equal opportunities for women in political life on a cross national basis It also identifies innovative solutions to redress the power sharing balance between women and men Offering a unique comparative perspective Sharing Power will appeal to students and scholars of politics women s studies history and legislative studies *The Journal of Parliamentary Information*, 2010 *Defeating Authoritarian Leaders in Postcommunist Countries* Valerie J. Bunce, Sharon L. Wolchik, 2011-06-30 From 1998

to 2005 six elections took place in postcommunist Europe that had the surprising outcome of empowering the opposition and defeating authoritarian incumbents or their designated successors Valerie J Bunce and Sharon L Wolchik compare these unexpected electoral breakthroughs They draw three conclusions First the opposition was victorious because of the hard and creative work of a transnational network composed of local opposition and civil society groups members of the international democracy assistance community and graduates of successful electoral challenges to authoritarian rule in other countries Second the remarkable run of these upset elections reflected the ability of this network to diffuse an ensemble of innovative electoral strategies across state boundaries Finally elections can serve as a powerful mechanism for democratic change This is especially the case when civil society is strong the transfer of political power is through constitutional means and opposition leaders win with small mandates
